

PRACTICE EXAM 9: STATION AGENT SIMULATION

100 questions. Suggested time limit: 1 hour 30 minutes. Choose the single best answer for each question. A numeric-only calculator is permitted.

1. Read all five passages and answer the question that follows.

Passage V: "A station's safety depends on prompt observation."

Passage W: "A station's safety depends on accurate reporting of what is observed."

Passage X: "A station's safety depends on timely action that follows accurate reports."

Passage Y: "A station's safety depends on the discipline to repeat all three across every shift."

Passage Z: "A station's safety depends on the verification that each action was carried out."

Together, the five passages most strongly support that station safety depends on:

- A. Observation only, with reporting and any verification treated as optional
- B. The full chain — observation, reporting, action, repetition, and verification
- C. Reporting alone, with no need for prior observation or any later verification
- D. Verification of completed actions only, with observation and reports as extras

2. A bulletin reads: "All of the following are required to qualify for a refund EXCEPT one." Which is NOT a required condition based on the typical rule that the fare was charged in error, the agent confirmed the error within ten minutes, the customer has not yet exited the station, and no other working payment method exists?

- A. The customer holding a separate paper ticket for a different planned trip
- B. The customer has no other working payment method available right now

- C. The customer has not yet exited the station before approaching the booth
- D. The fare was charged in error and the error has been confirmed in time

3. Choose the words that best complete the sentence: " _____ the platform was crowded, the agent kept customers moving steadily, _____ no bottleneck would form near the stairs."

- A. Because / despite
- B. Unless / although
- C. Although / so that
- D. Therefore / however

4. Read all five passages and answer the question that follows.

Passage V: "Customers value courteous treatment."

Passage W: "Customers value accurate information."

Passage X: "Customers value a clear next step."

Passage Y: "Customers value patience under pressure."

Passage Z: "Customers value follow-through that confirms the next step was understood."

Together, the passages most strongly support that strong customer service requires:

- A. Courtesy alone, with accuracy and next steps treated as optional
- B. Courtesy, accuracy, a clear next step, patience, and follow-through together
- C. Accuracy alone, regardless of the tone of the interaction with the customer
- D. A clear next step alone, with courtesy treated as a routine extra

5. A notice reads: "The northbound entrance closes Saturday from 10:00 PM to Sunday 5:00 AM for emergency repairs. Customers should use the southbound entrance during that window; if the southbound entrance is also closed, customers should use the side service door." On Sunday at 3:00 AM, the southbound entrance is also closed. A customer should:

- A. Wait until 5:00 AM, when the northbound entrance reopens
- B. Walk to a different station entirely for the duration of the closure
- C. Enter through the northbound entrance despite the closure notice
- D. Use the side service door, since both main entrances are closed

6. Which sentence is grammatically correct?

- A. Each of the customers were waiting on the proper platform side today
- B. Each of the customers are waiting on the proper platform side today
- C. Each of the customers was waiting on the proper platform side today
- D. Each of the customers have been waiting on the proper platform side

7. A rule states: "All of the following must hold to grant a courtesy re-entry EXCEPT during a declared service disruption, which waives the time condition only: the fare error was confirmed within five minutes, the customer has not exited the station, and no other working payment method exists." Which single failing condition would deny the re-entry even during a declared service disruption?

- A. The customer has a working contactless payment available right now
- B. The agent confirmed the fare error after seven minutes had elapsed
- C. The fare error was confirmed within five minutes of the customer's report
- D. The customer is still inside the station and has not yet exited

8. Read all five passages and answer the question that follows.

Passage V: "Notices that lack a clear subject heading slow the reader down."

Passage W: "Notices that omit the specific facts that change confuse the reader."

Passage X: "Notices that fail to state the customer's next action leave the reader uninformed."

Passage Y: "Notices that bury the time the change begins make the customer plan poorly."

Passage Z: "Notices that omit the responsible point of contact leave the customer with no recourse."

Together, the passages most strongly support that a useful notice must include:

- A. Only a clear subject heading, with the rest inferred by the reader on the spot
- B. A subject heading, facts that change, the next action, the time, and the contact
- C. Only the customer's next action, since headings, facts, and time only inform
- D. Only the specific facts that change, with headings and timing as extras

9. Choose the sentence that uses the correct word.

- A. The customer brought less bags through the turnstile than expected today
- B. The customer brought fewer bags through the turnstile than expected today
- C. The customer brought lesser bags through the turnstile than expected today
- D. The customer brought few of bags through the turnstile than expected today

10. Which sentence uses parallel structure correctly?

- A. The agent greeted customers, was answering questions, and to log defects
- B. The agent greeting customers, answers questions, and logged defects
- C. The agent greeted customers, answered questions, and logged defects
- D. The agent greets customers, was answering questions, and logged defects

11. A bulletin reads: "Off-peak fares apply weekdays from 10:00 AM to 3:30 PM and weekends from 6:00 AM to 8:00 PM, except on declared holidays, when off-peak fares apply all day, unless the holiday is also an event day, in which case peak fares apply system-wide regardless." Which of the following would NOT result in off-peak fares?

- A. A declared holiday that is also a declared event day on the same date
- B. A declared holiday on a Tuesday with no event status that day
- C. A declared holiday on a Saturday with no event status that day

D. A declared holiday on a Sunday with no event status that day

12. Choose the word that best completes the sentence: "Customers gather near the front of the platform during the morning rush; _____, the rear cars often leave the station only partially full."

- A. consequently
- B. nevertheless
- C. similarly
- D. otherwise

13. Read all five passages and answer the question that follows.

Passage V: "Calmness in the agent steadies anxious customers."

Passage W: "Brevity in the agent's words keeps the message memorable."

Passage X: "Clarity in the agent's words prevents misunderstandings."

Passage Y: "Patience in the agent's manner gives space for understanding to land."

Passage Z: "Consistency in the agent's approach builds trust over many interactions."

The five passages together suggest that an effective communicating agent practices:

- A. Brevity at the expense of calmness when crowds become anxious
- B. Clarity that overrides calmness and patience in any difficult interaction
- C. Calmness only, with brevity, clarity, patience, and consistency optional
- D. Calmness, brevity, clarity, patience, and consistency together

14. Choose the sentence that uses the correct word.

- A. The agent insured every customer received an accurate fare receipt today
- B. The agent assured every customer received an accurate fare receipt today
- C. The agent ensured every customer received an accurate fare receipt today

D. The agent ensured every customer received an accurate fare receipt today

15. A bulletin reads: "Customers should add five minutes to their usual trip during construction, ten minutes during event days, and fifteen minutes during a declared service disruption; if multiple conditions apply at once, only the longest applies." On a declared service disruption that is also an event day, customers should add:

- A. Fifteen minutes, the longest applicable allowance under the rule
- B. Twenty-five minutes, the sum of disruption and event-day allowances
- C. Ten minutes, the event-day allowance overriding the disruption rule
- D. Five minutes, the construction allowance as the default value

16. Which sentence avoids ambiguous pronoun reference?

- A. When she finished the report, the supervisor reviewed it carefully soon
- B. When the agent finished the report, the supervisor reviewed it carefully
- C. When she finished it, the supervisor reviewed it carefully right away
- D. When they finished, they reviewed it carefully and filed it after

17. A policy reads: "All of the following are grounds to escalate a complaint to a supervisor EXCEPT a routine question that can be answered at the booth: a safety concern, a confirmed double charge the agent cannot reverse, or a dissatisfied customer after an attempt to resolve has been made." Which is NOT a basis for escalation under the policy?

- A. A routine fare question the agent answers at the booth directly
- B. A safety concern reported by a customer at the booth window
- C. A confirmed double charge the agent cannot reverse at the booth
- D. A dissatisfied customer after a direct resolution attempt has failed

18. Choose the words that best complete the sentence: " _____ the elevator was out of service, the agent posted a notice at the entrance and at the booth, _____ no customer would arrive at the platform unprepared."

- A. Therefore / however
- B. Although / despite
- C. Because / so that
- D. Unless / because

19. Read all five passages and answer the question that follows.

Passage V: "An incident report records what the agent observed."

Passage W: "An incident report records the order in which events happened."

Passage X: "An incident report records the location and the exact time."

Passage Y: "An incident report omits guesses and conclusions about cause."

Passage Z: "An incident report names the people involved and any witnesses present."

The five passages together support that a usable incident report must include:

- A. Suspicions about cause alongside observations and timing details together
- B. Observations, order of events, location, time, no guesses about cause, and the people involved
- C. Only the location and time, since order and observation may shift later
- D. The order of events and the time only, with no location or omissions noted

20. Which sentence is punctuated correctly?

- A. The train arrived and the platform cleared the agent locked the booth
- B. The train arrived, and the platform cleared the agent, locked the booth
- C. The train arrived; and the platform cleared, the agent locked the booth
- D. The train arrived, and the platform cleared; the agent locked the booth

21. A rule states: "An agent may permit a customer to pass through the service gate without paying only when a fare reader has visibly failed, the customer has no other working payment method, and the agent can confirm the failure within five minutes, except during a declared service disruption, when the time condition is waived but the other conditions still apply." During a declared service disruption, a customer's fare reader visibly failed, the customer has a working contactless payment, and the failure could not be confirmed within five minutes. According to the rule, the agent should:

- A. Refuse to permit the customer because a working payment method still exists
- B. Permit the customer through because the visible failure alone is enough
- C. Permit the customer through because the disruption waives every condition
- D. Permit the customer through only after charging a partial fare at the gate

22. An agent notices: the booth's printer has stopped producing receipts, the rest of the booth equipment works, and a colleague mentioned a printer technician was called in earlier today. The most reasonable conclusion is that:

- A. The booth's electrical system has failed completely across all equipment
- B. Scheduled printer service is the likely cause of the silence
- C. The booth equipment is operating normally despite the lack of receipts
- D. A customer has tampered with the printer to stop the receipts somehow

23. A rule states: "All of the following must hold to grant a delayed-train credit EXCEPT during a declared service disruption, when the platform condition is waived: the delay exceeded ten minutes, the customer requested the credit before leaving the platform, and the customer described the delay accurately." During a declared service disruption, a customer requests a credit after leaving the platform; the delay was fifteen minutes, and the customer described it accurately. According to the rule, the agent should:

- A. Deny the credit because the platform condition is never waived during disruptions
- B. Grant the credit only if a supervisor signs off on it personally first
- C. Grant the credit only if the customer pays a partial replacement fare
- D. Grant the credit because the disruption waives the platform condition

24. An agent observes: ridership at the station drops sharply on every Federal holiday, drops moderately on observed-only holidays, and stays normal on regular weekdays. On the morning of an upcoming Federal holiday, the agent can reasonably expect ridership to:

- A. Drop sharply, consistent with the established Federal-holiday pattern
- B. Stay normal, the same as a regular weekday morning at the station
- C. Spike higher than a regular weekday because of holiday traffic
- D. Drop moderately, matching the observed-only holiday pattern instead

25. Three rules apply in this priority order: customer safety first, then declared service disruptions, then routine customer service, then administrative records. An agent updating administrative records sees a customer slip near a wet step while a declared service disruption notice still needs posting and other customers wait at the booth. According to the priority order, the agent should:

- A. Address the slip near the wet step first as a safety concern
- B. Finish updating the administrative records before responding at all
- C. Post the declared service disruption notice before attending the slip
- D. Serve the customers waiting at the booth before any other action

26. A rule states: "On crowded platforms, agents may close gates feeding the platform; gates remain closed only as long as crowd density warrants, and never longer than thirty minutes without supervisor approval." Which action would NOT be permitted by the rule?

- A. Closing a gate when crowd density first surges suddenly without warning
- B. Keeping a gate closed for fifty minutes with no supervisor approval at all
- C. Reopening a gate once crowd density has finally subsided to safe levels
- D. Closing a gate during a period of increasing platform congestion

27. An agent observes that whenever a major game ends at the nearby stadium, station traffic spikes for two hours after the final whistle and remains above normal for a third hour. Based on this pattern, three hours after a major game ends, the agent can reasonably expect station traffic to be:

- A. Spiking sharply higher than during the first two hours after the game
- B. Lower than the normal level for an extended off-peak period afterward
- C. Already returned to a normal off-peak weekday level entirely
- D. Still above the normal level but tapering toward normal

28. A rule states: "An agent accepts lost items and logs them within fifteen minutes; if the item appears valuable, the agent calls a supervisor before logging, except during a declared emergency, when the agent secures the item and logs it later, regardless of value." During a declared emergency, a customer turns in a wallet that appears valuable. According to the rule, the agent should:

- A. Call a supervisor immediately before securing the wallet at all
- B. Secure the wallet and log it later, regardless of its apparent value
- C. Refuse to take the wallet until the emergency has fully ended
- D. Wait until the end of the shift to log the wallet at all

29. An agent observes that whenever the elevator is out of service, complaints about long lines at the accessibility gate rise sharply. Based on this pattern, when the elevator is in service, the agent can reasonably expect:

- A. Fewer complaints about accessibility-gate lines than during outages
- B. Higher complaint rates than during the elevator outages overall
- C. Identical complaint rates regardless of the elevator's status
- D. Complaints unrelated to the elevator's status entirely overall

30. An agent notices an unusual chemical smell near a stairwell, several customers covering their faces, and a faint hissing sound from a panel below the steps. Considering only the recognition step, the agent should first conclude:

- A. The conditions are entirely normal for a station at this hour today
- B. The customers covering their faces are simply tired riders today
- C. A potential leak or hazardous condition is developing here right now

D. The hissing panel is unrelated to the smell and is routine

31. A rule states: "Fare disputes are resolved at the booth when the issue can be confirmed on the spot; otherwise the customer is given a written reference number and directed to customer service, except when the dispute concerns an obvious double charge visible in the agent's records, in which case the agent resolves it at the booth regardless." A customer disputes a charge that cannot be confirmed at the booth and is not visible as a double charge in the records. According to the rule, the agent should:

A. Resolve the dispute immediately by waiving the charge personally

B. Hold the customer at the booth until the issue is somehow confirmed

C. Issue a written reference number and direct the customer to customer service

D. Tell the customer there is no procedure for unconfirmed disputes available

32. Considering only the recognition of a problem, which observation most clearly signals something is wrong?

A. The arrival board updates normally with the next two trains shown clearly

B. Customers tap their cards and pass through the turnstiles freely as usual

C. The booth's lighting is steady and at its usual brightness level today

D. The platform is filling far faster than the arriving trains can clear it

33. A rule states: "An agent grants step-free assistance whenever an elevator or escalator is unavailable to a customer who needs step-free access; if both are unavailable and the agent cannot leave the booth, the agent calls for assistance and posts a notice; if both are unavailable and the agent can leave the booth, the agent assists personally." Which action would NOT be consistent with the rule?

A. Refusing assistance because both the elevator and escalator are unavailable

B. Calling for assistance when both are unavailable and the agent cannot leave

C. Granting assistance when only the elevator is unavailable to the customer

D. Assisting personally when both are unavailable and the agent can leave

34. An agent notices that lost-card reports cluster heavily at the end of school days but rarely on holidays or weekends. The most reasonable conclusion is that:

- A. Lost-card reports happen evenly throughout the year regardless of day
- B. Holidays cause more cards to be lost across the entire system overall
- C. Weekends consistently see more lost cards than school days do
- D. End-of-school activity is likely associated with more lost cards

35. A rule states: "An agent reports any defect to the maintenance desk during the same shift; safety-critical defects are reported immediately by radio, except during a declared emergency, when only the emergency itself is communicated and defects are logged after the emergency ends." Which is NOT consistent with the rule?

- A. Reporting a non-critical defect to the maintenance desk by shift's end
- B. Reporting a safety-critical defect immediately by radio in normal operations
- C. Logging a defect noticed during a declared emergency after it ends
- D. Reporting a safety-critical defect by radio during a declared emergency

36. An agent observes: the PA system has been silent for thirty minutes, a "test in progress" notice is posted at the booth, and a colleague said the audio team was running checks today. The most reasonable conclusion is that:

- A. Scheduled audio testing is most likely causing the silence
- B. The PA system has failed permanently and cannot be restored at all
- C. Customers are tampering with the PA system from the platform
- D. The silence has no relationship to any testing activity in the station

37. Which is the earliest indication that boarding flow is beginning to break down at a single train door?

- A. Customers begin bunching at one door while other doors stand empty

- B. Trains arrive and depart on the platform on their posted schedule
- C. The platform holds a moderate, evenly distributed crowd as usual
- D. Boarding announcements play clearly at their usual intervals

38. A rule states: "An agent issues a delayed-train credit when a train was delayed more than ten minutes, the customer requests the credit before leaving the platform, and the customer can describe the delay accurately, except during a declared service disruption, when the platform condition is waived but the other two conditions still apply." During a declared service disruption, a customer requests a credit after leaving the platform; the delay was fifteen minutes, and the customer described it accurately. According to the rule, the agent should:

- A. Deny the credit because the platform condition is never waived
- B. Grant the credit only if a supervisor signs off on it personally first
- C. Grant the credit because the disruption waives the platform condition
- D. Grant the credit only if the customer pays a partial replacement fare

39. An agent simultaneously sees: a routine fare question, a maintenance log due soon, water dripping onto a live electrical box, and a customer requesting directions. Which should the agent address first?

- A. The fare question, since it can be answered very quickly
- B. The maintenance log, since it has a fast-approaching deadline today
- C. The directions request, since it is simple to handle quickly
- D. The water dripping onto the live electrical box, an immediate hazard

40. A rule states: "Customers may not enter through the accessibility gate without need; agents open the gate only for customers with accessibility needs, large items that cannot fit the turnstile, or during a declared evacuation, when any customer may use the gate." Which action would NOT be permitted outside an evacuation?

- A. Opening the gate for a customer who uses a wheelchair to enter the station
- B. Opening the gate for a customer with no accessibility need or large item

- C. Opening the gate for a customer with a clear documented accessibility need
- D. Opening the gate for a customer carrying an item too large for the turnstile

41. Considering only the recognition of a problem, which observation most clearly indicates one?

- A. A burning smell is coming from behind the fare-machine panel right now
- B. The arrival board lists the next trains on their normal schedule
- C. Customers tap their cards and pass through the turnstiles freely as expected
- D. The booth telephone receives an ordinary routine call as usual today

42. A rule states: "An agent issues a courtesy re-entry only when a fare error was confirmed within five minutes, the customer has not exited the station, and no other working payment method exists, except during a declared service disruption, when the time condition is waived but the other two conditions still apply." During a declared service disruption, a fare error was confirmed within ten minutes, the customer remained inside the station, and the customer has no other working payment method. According to the rule, the agent should:

- A. Refuse the re-entry because the five-minute condition was missed
- B. Grant the courtesy re-entry because the disruption waives the time condition
- C. Refuse the re-entry because re-entries never apply during a service disruption
- D. Grant the re-entry only if the customer pays a partial replacement fare

43. A rule states: "An agent may leave the booth to assist a customer only if doing so does not leave the booth unattended during a transaction, except during a declared safety emergency, when the agent may leave immediately regardless." A customer at the booth is mid-transaction when a declared safety emergency is announced. According to the rule, the agent should:

- A. Finish the in-progress transaction before responding to the emergency
- B. Refuse to respond until a supervisor has personally arrived first
- C. Close the booth and wait at the window for the emergency to end
- D. Leave the booth immediately to respond to the declared emergency

44. An agent notices four things at once: a routine maintenance log, a customer asking for change, an unattended bag on a bench, and a customer complaining about a missed train. Which should the agent address first?

- A. The customer asking for change, since it is the simplest task to handle
- B. The unattended bag on the bench, a possible security concern
- C. The customer complaining about the missed train, the most upset right now
- D. The routine maintenance log, since it is part of regular work

45. A frustrated customer raises their voice and accuses the agent of being unhelpful after a long delay. The best response is to:

- A. Match the customer's tone so the customer hears the agent clearly
- B. Walk away from the booth window until the customer leaves on their own
- C. Argue at length that the delay was not the agent's own fault at all
- D. Stay calm, acknowledge the frustration, and explain the next step

46. A customer asks whether a single contactless tap covers both the train trip and a connecting bus transfer within the free-transfer window. The agent should explain that:

- A. The single tap covers the train trip and the connecting bus transfer within the window
- B. Tap-and-go cannot be used for any kind of bus or rail connection at all
- C. Bus connections always require a brand-new fare with no transfers allowed
- D. The customer must purchase a separate paper bus ticket at the station booth

47. A customer with limited English struggles to ask for directions to a hospital. The best approach is to:

- A. Speak slowly, use simple words, draw on a map, and confirm understanding
- B. Tell the customer to come back with someone who can fully translate
- C. Speak much louder so the customer can hear the unfamiliar English words

D. Give the directions once briefly and turn to the next customer in line

48. A customer demands the agent's personal phone number to follow up on a complaint. The agent should:

- A. Provide the personal number so the customer feels heard and supported
- B. Refuse the request rudely and tell the customer to leave the booth at once
- C. Pretend not to hear the request and walk away from the booth window
- D. Politely decline and explain the official channel for the complaint follow-up

49. A rider asks the agent why a planned route requiring two transfers is so complicated. The best response is to:

- A. Tell the customer the route is not actually complicated at all in practice
- B. Acknowledge the complexity, walk through the route step by step, and confirm understanding
- C. Wave the customer off and ask them to look it up online instead
- D. Say there is nothing the agent can do to make the route any easier today

50. A customer thanks an agent for help and asks one more brief question. The agent should:

- A. Tell the customer that one question is the booth's strict limit today
- B. Pretend not to hear the additional question and turn to the next customer
- C. Answer the additional question courteously and accurately before moving on
- D. Refer the customer to the agency website instead of giving any answer

51. A customer complains that a different agent was rude earlier in the day. The most professional response is to:

- A. Defend the other agent and dismiss the complaint outright as untrue
- B. Listen, acknowledge the concern, and explain the feedback channel

- C. Agree that the other agent is rude to nearly every customer at all times
- D. Tell the customer there is no procedure for that kind of complaint at all

52. A customer using a walker and carrying packages cannot fit through the turnstile. The agent should:

- A. Tell the customer the standard turnstile is the only entry available here
- B. Assist the customer through the ADA-accessible gate with the packages
- C. Ask the customer to leave the packages outside the station entrance
- D. Send the customer to a different station with no turnstiles at all

53. A customer asks the fastest route to an airport requiring a transfer. The best response includes:

- A. A statement that the airport route is too complicated to describe at all
- B. Only the name of the first line to board at this station right now
- C. A suggestion that the customer should take a taxi instead of the train
- D. The lines, the direction of travel, the transfer point, and confirmation of understanding

54. A customer angrily demands a refund because the train was delayed by a signal problem. The best response is to:

- A. Argue at length that the delay was not the agent's own fault at all
- B. Hand the customer cash from the booth drawer to satisfy the demand quickly
- C. Acknowledge the frustration and explain the actual refund process calmly
- D. Tell the customer to take their complaint somewhere else right now

55. A customer asks who is eligible for a reduced fare. The agent should explain that reduced fares are generally available to:

- A. Eligible seniors, customers with qualifying disabilities, and eligible students

- B. Any customer who simply asks for one at the station booth at any time
- C. Only customers who agree to ride during the off-peak hours only
- D. Customers who buy more than a set number of rides at once

56. During a crowded rush, several customers ask questions at once. The most professional approach is to:

- A. Answer only the loudest customer and ignore everyone else completely
- B. Stop responding to anyone until the crowd disperses on its own
- C. Address each customer in turn, calmly and courteously
- D. Tell all the customers to come back at a much quieter hour today

57. Which of the following is a standard Station Agent duty?

- A. Setting the timing of the signals that govern all of the train movements
- B. Performing structural repairs to the platform and the station stairways
- C. Operating the train's controls during the customer's actual journey today
- D. Observing and reporting overall station conditions and unusual occurrences

58. During a platform emergency, an agent's appropriate role includes:

- A. Personally repairing the equipment that caused the emergency on the spot
- B. Directing customers to safe exits and requesting the proper assistance
- C. Leaving the station to find help on the street outside immediately
- D. Waiting at the booth until the emergency resolves itself

59. Which task falls within an agent's "fingertip maintenance" duties rather than requiring maintenance staff?

- A. Replacing a burned-out tunnel light fixture out on the tracks
- B. Rewiring the booth's electrical panel after a small power outage
- C. Clearing a stray receipt jammed in a fare-card reader slot
- D. Repairing a cracked step on the station's main staircase

60. A customer raises their voice and blames the agent for a fare machine error. The agent should:

- A. Raise their own voice in return so the customer hears clearly today
- B. Walk away from the booth until the customer finally leaves on their own
- C. Tell the customer that the error is entirely their own fault for using it
- D. Remain calm, acknowledge the issue, and explain the next step

61. A rule states: "Handle tasks by priority — emergencies first, then customer service, then administrative; within the same priority, by earliest arrival; if two arrived together, by safety relevance first; if neither is a safety concern, by shorter task first." Tasks: (1) admin paperwork at 9:00, (2) customer with a quick question at 9:02, (3) safety emergency at 9:06, (4) customer with a long dispute at 9:02. What is the correct order?

- A. 2, 4, 3, 1
- B. 1, 2, 4, 3
- C. 3, 4, 2, 1
- D. 3, 2, 4, 1

62. Order the steps for processing a reduced-fare card purchase: (1) Greet the customer and ask what they need. (2) Verify eligibility identification. (3) Accept the payment. (4) Add the reduced value. (5) State the new balance.

- A. 2, 1, 4, 3, 5
- B. 1, 4, 2, 3, 5
- C. 1, 2, 3, 4, 5

D. 5, 4, 3, 2, 1

63. A rule says to sort booth-log entries by date ascending, then by time ascending, then by entry-type alphabetically. Entries: (a) 10/02 09:30 "Repair," (b) 10/01 16:00 "Audit," (c) 10/02 09:30 "Alert," (d) 10/01 09:00 "Notice." What is the correct order?

A. a, b, c, d

B. d, b, c, a

C. b, c, a, d

D. d, c, b, a

64. Order the steps for assisting a customer with a stroller through the service gate: (1) Confirm the customer has paid the fare. (2) Open the service gate. (3) Guide the customer through. (4) Close the gate after the customer.

A. 4, 3, 2, 1

B. 3, 2, 4, 1

C. 2, 3, 1, 4

D. 1, 2, 3, 4

65. A rule says: "Sort priority tickets first by urgency (high before low), then by submission time (earliest first); if both match, sort by alphabetical title; if all three match, sort by location number ascending." Tickets: P (high, 9:00, "Cable," loc 4), Q (high, 9:00, "Alarm," loc 7), R (high, 9:00, "Alarm," loc 2), S (low, 8:30, "Beep," loc 1). What is the correct order?

A. Q, R, P, S

B. R, Q, P, S

C. P, Q, R, S

D. S, P, Q, R

66. Order these emergency steps: (1) Direct customers to the nearest safe exit. (2) Recognize the emergency and confirm the alert. (3) Make a calm announcement to customers. (4) Request police or medical help as needed.

A. 4, 2, 3, 1

B. 3, 2, 1, 4

C. 2, 3, 1, 4

D. 1, 4, 2, 3

67. Order the steps for handling a found wallet: (1) Receive the wallet from the customer. (2) Note where it was found and the time. (3) Log the wallet's description in the system. (4) Forward the wallet to lost property.

A. 1, 2, 3, 4

B. 4, 3, 2, 1

C. 3, 4, 1, 2

D. 2, 1, 4, 3

68. A rule says to rank entrances from busiest to least busy. Counts: Gate W 95, Gate X 220, Gate Y 110, Gate Z 140. What is the correct order?

A. W, X, Y, Z

B. Y, Z, W, X

C. Z, X, W, Y

D. X, Z, Y, W

69. A rule says: "Serve customers by arrival time; if two arrived together, serve the safety concern first; if neither is a safety concern, serve the shorter task first." Three customers all arrived at 8:00: P (long fare dispute), Q (quick directions), R (reports a spill). What is the correct order?

A. P, R, Q

- B. Q, R, P
- C. R, P, Q
- D. R, Q, P

70. Order the steps for handling a customer whose card failed at the turnstile: (1) Greet and ask what happened. (2) Confirm the failure and the cause. (3) Open the service gate to let the customer through. (4) Advise the customer to resolve the card balance.

- A. 4, 3, 2, 1
- B. 3, 2, 1, 4
- C. 1, 2, 3, 4
- D. 2, 1, 3, 4

71. A rule states: "Post the most urgent notice first; among equally urgent notices, post the earliest effective date first; among equal dates, post alphabetically by title; among equal titles, post by location number ascending." Notices: T (urgent, Tue, "Closure," loc 5), U (urgent, Mon, "Detour," loc 3), V (urgent, Mon, "Closure," loc 9), W (urgent, Mon, "Closure," loc 4). What is the correct order?

- A. T, V, W, U
- B. U, T, W, V
- C. V, W, T, U
- D. W, V, U, T

72. Arrange these fare-card balances from highest to lowest: \$12.00, \$2.15, \$9.40, \$9.05.

- A. \$2.15, \$9.05, \$9.40, \$12.00
- B. \$9.40, \$12.00, \$9.05, \$2.15
- C. \$9.05, \$9.40, \$12.00, \$2.15
- D. \$12.00, \$9.40, \$9.05, \$2.15

73. A new agent must list stations in reverse travel order. The route runs, in order traveled: Oak, Maple, Center, Elm, Pine. Listed from last to first, the order is:

- A. Maple, Oak, Elm, Center, Pine
- B. Oak, Maple, Center, Elm, Pine
- C. Pine, Elm, Center, Maple, Oak
- D. Center, Pine, Maple, Oak, Elm

74. Order the steps for handling a non-urgent maintenance request: (1) Receive the request and confirm the description. (2) Note the location and the time of the request. (3) Submit the request to the maintenance desk. (4) Log the submission for the shift record.

- A. 4, 3, 2, 1
- B. 2, 1, 3, 4
- C. 1, 2, 3, 4
- D. 3, 4, 1, 2

75. A customer starts with \$20.00, adds \$10.00 with a 10% bonus on the added amount, then takes 4 rides at \$2.90 each. What is the new balance?

- A. \$18.40
- B. \$19.40
- C. \$20.40
- D. \$17.40

76. A customer adds an amount to a card and receives a 10% bonus, ending up with \$33.00 total on the card. What was the amount the customer added before the bonus?

- A. \$30.00
- B. \$33.00

- C. \$36.30
- D. \$29.70

77. A customer paid for 4 rides at \$2.90 each plus a \$1.00 card fee with a \$20 bill. How much change is due?

- A. \$7.40
- B. \$4.40
- C. \$5.40
- D. \$6.40

78. A card holds \$20.00. The customer takes 3 rides at \$2.90 each, then adds \$5.00. What is the new balance?

- A. \$11.20
- B. \$16.30
- C. \$14.30
- D. \$15.20

79. A \$4.00 charge is reduced by 25%. What is the reduced charge?

- A. \$2.50
- B. \$2.75
- C. \$3.50
- D. \$3.00

80. A customer's card balance dropped from \$50.00 to \$35.00. What percent of the original value was used?

- A. 20%
- B. 25%
- C. 35%
- D. 30%

81. An agent records sales of \$2.90, \$4.35, \$12.00, \$5.80, and \$1.45 in one hour. What is the total?

- A. \$25.50
- B. \$27.00
- C. \$26.50
- D. \$24.50

82. A customer adds \$40.00 and receives a 10% bonus. What is the total value on the card after the bonus is applied?

- A. \$42.00
- B. \$44.00
- C. \$40.40
- D. \$40.00

83. A card holds \$25.00 and the fare is \$2.50 per ride. How many full rides can the customer take, and what amount remains on the card?

- A. 9 rides with \$2.50 remaining on the card
- B. 8 rides with \$5.00 remaining on the card
- C. 10 rides with \$0.00 remaining on the card
- D. 11 rides with the card going slightly negative

84. Last month a station had 400 reports filed; this month it has 500 reports. By what percent did reports increase?

- A. 25%
- B. 20%
- C. 30%
- D. 50%

85. An agent faces north, turns 90 degrees right (now facing east), then turns 90 degrees right (now facing south), then turns 90 degrees left. Working each step in order, which direction is the agent now facing?

- A. South
- B. North
- C. East
- D. West

86. An agent walks east for one block, turns 90 degrees right and walks one block, then turns 90 degrees right and walks one block, then turns 90 degrees right and walks one block. Working each step in order, in which direction is the agent now walking?

- A. West
- B. East
- C. South
- D. North

87. Using the four-line map below, a customer at Hill Rd must reach Lake Pl. Which is the most direct route?

- A. Ride the green line south to Center, then transfer to the red line east to Lake Pl
- B. Ride the green line south to Bay Ave, then transfer west to Park West and back east
- C. Stay on the green line and continue south past Hill Rd, then take the red line east
- D. Transfer at Hill Rd from the green line to the red line, then ride east to Lake Pl

87 — Reservation note: key = D. Option D placed at position D. ✓

88. Using the four-line map below, a customer rides the red line east from Park West to Hill Rd, then transfers to the green line south. After completing the transfer, in which direction is the customer now traveling?

- A. North
- B. South
- C. East
- D. West

89. Using the four-line map below, a customer at Shore must reach Bay Ave with the fewest transfers. Which route is correct?

- A. Ride yellow north to Lake Pl, transfer west on red to Hill Rd, transfer south on green to Bay Ave
- B. Ride directly from Shore to Bay Ave on a single line with no transfers needed at all
- C. Ride yellow north to Tower, then transfer south on a parallel line to Bay Ave
- D. Ride yellow north past Lake Pl directly to Bay Ave without stopping or transferring

90. From inside the booth facing east toward the platform, an agent sees an emergency exit to the north. A customer on the platform facing west toward the booth would see that same exit on their:

- A. Left
- B. Right
- C. Front
- D. Rear

91. An agent walks north, then turns 90 degrees right, then turns 90 degrees right, then turns 90 degrees right. Working each step in order, in which direction is the agent now facing?

- A. South
- B. East

- C. North
- D. West

92. An agent looks at a clock in a mirror. The mirror image shows the hands pointing to what appears to be 9:00. The actual time on the clock is:

- A. 9:00
- B. 12:00
- C. 3:00
- D. 6:00

93. Read and remember: "Agent Lee covers booths 1 and 2 from 6:00 AM to 11:00 AM, booth 3 from 11:00 AM to 1:00 PM, and booth 5 after 1:00 PM. Agent Diaz covers booth 4 all day, and Agent Park covers booths 6 and 7 after 2:00 PM." At 12:30 PM, which booth does Agent Lee cover?

- A. Booth 5 after the early afternoon switch
- B. Booths 6 and 7 with Agent Park after 2:00 PM
- C. Booth 3 between 11:00 AM and 1:00 PM
- D. Booths 1 and 2 from the early morning shift

94. Remember this announcement: "The downtown express departs at 3:14, the local at 3:08, the limited at 3:10, and the rush special at 3:05, all from the same platform." Which train departs first?

- A. The rush special at 3:05
- B. The local at 3:08
- C. The limited at 3:10
- D. The express at 3:14

95. Remember this notice: "Weekend track work affects the Red line between Center and Elm, the Blue line at Pine St only, and the Green line not at all this weekend." On the weekend, which line is affected near Pine St?

- A. The Red line near Pine St this weekend
- B. The Blue line near Pine St this weekend
- C. The Green line near Pine St this weekend
- D. Both the Red and Blue lines near Pine St this weekend

96. Remember this stop order: Oak, Birch, Cedar, Dale, Elm, Fir, Grove. Which stop is three stops after Cedar?

- A. Dale
- B. Elm
- C. Fir
- D. Grove

97. An arrow points to the right (east). It is rotated 90 degrees counterclockwise (now pointing up). It is then flipped vertically (top-bottom). Working step by step, the arrow now points:

- A. Down
- B. Right
- C. Left
- D. Up

98. An agent looks at the word "EXIT" in a mirror placed directly opposite. The mirror image of the word reads, from left to right:

- A. TIXE, the letters reversed in order
- B. EXIT, identical to the original word

- C. ETIX, an alternative spelling
- D. XETI, a different rearrangement

99. Five boxes sit in a row labeled V, W, X, Y, Z from left to right. If each box moves two positions to the right and any that fall off the right wrap around to the front in order, what is the new left-to-right order?

- A. V, W, X, Y, Z
- B. X, Y, Z, V, W
- C. Y, Z, V, W, X
- D. Z, V, W, X, Y

100. A T-shaped piece has its long arm pointing up and its short cross-arm at the top. After rotating the piece 180 degrees, the long arm points:

- A. Up
- B. Down
- C. Left
- D. Right

Practice Exam 9: Answer Key and Explanations

1. B — The full chain — observation, reporting, action, repetition, and verification. Each of the five passages adds one element, and together they require the entire chain. The other options strip out elements the passages explicitly include.
2. A — Holding a separate paper ticket for a different planned trip. The refund rule lists no such requirement. The other options name conditions the rule does require.
3. C — "Although" then "so that." The first blank concedes the crowded platform, and the second states the purpose of keeping movement steady. Concession followed by purpose fits the sentence.
4. B — Courtesy, accuracy, a clear next step, patience, and follow-through together. Each passage names one element of strong service, and together they form the joint standard. The other options drop four of the five.
5. D — Use the side service door. The notice's chained condition routes customers to the side door when both main entrances are closed. Both are closed, so the side door applies.

6. C — "Each ... was waiting" with singular noun. "Each" is singular and takes a singular verb. The other versions break agreement.
7. A — The customer has a working contactless payment available. The disruption exception waives only the time condition; the other conditions, including "no other working payment method," remain in force, so a working payment denies re-entry.
8. B — A subject heading, facts that change, the next action, the time, and the contact. Each passage names one element a useful notice must include. The other options drop four of the five.
9. B — "fewer" with countable bags. Bags are countable, so "fewer" is correct. "Less," "lesser," and "few of" do not fit a count noun.
10. C — Three parallel past-tense verbs. "Greeted, answered, and logged" share the same form. The other versions mix tenses or shift to a non-finite form.
11. A — A declared holiday that is also an event day. The event-day override sends fares to peak system-wide. The other options trigger the holiday exception, which produces off-peak fares.
12. A — "consequently" signals result. Front-of-platform crowding causes partially full rear cars, a cause-and-effect link. Similarity or contrast words would misstate the relationship.
13. D — Calmness, brevity, clarity, patience, and consistency together. Each passage attributes a distinct effect to one of the five habits. The other options reduce the practice to one habit.
14. C — "ensured" means made certain. "Ensure" is the verb for guaranteeing an outcome; "insure" relates to insurance, "assure" reassures a person, "endured" means tolerated. Word meaning fixes the choice.
15. A — Fifteen minutes, the longest applicable allowance. The rule applies only the longest condition when several apply, and a declared disruption (fifteen minutes) exceeds the event-day allowance (ten). The longest condition governs.
16. B — Repeats the noun to avoid pronoun ambiguity. Naming the agent and the supervisor explicitly removes any unclear pronoun reference. The other versions leave the antecedent unclear.
17. A — A routine fare question the agent answers at the booth. The escalation rule expressly excludes routine questions. The other options name valid bases for escalation.
18. C — "Because" then "so that." The first blank introduces the cause of posting, and the second introduces the purpose. Cause followed by purpose fits the sentence.
19. B — Observations, order of events, location, time, no guesses about cause, and the people involved. Each passage adds one element to a usable report. The other options drop required elements.
20. D — Comma before "and" joining two clauses, then a semicolon before the third. Two coordinated clauses can be joined with a comma and "and," and a semicolon separates the next independent clause. The other versions are run-ons.
21. A — Refuse because a working payment method still exists. The disruption exception waives only the time condition; the other conditions, including "no other working payment method," remain in force. The remaining unwaived condition fails.
22. B — Scheduled printer service is the likely cause. The stopped printer, the rest of the booth working, and the technician callout together point to planned servicing. It is the conclusion fitting every clue.
23. D — Grant the credit because the disruption waives the platform condition. The disruption exception waives the platform requirement, and the delay and description conditions are both met. The exception controls when it applies.
24. A — Drop sharply, consistent with the Federal-holiday pattern. The reliable pattern predicts a sharp drop on Federal holidays. The conclusion stays within what the pattern supports.

25. A — Address the slip near the wet step first. Customer safety holds the top priority in the layered system. Safety always governs when concerns compete.
26. B — Keeping a gate closed for fifty minutes with no supervisor approval. The rule caps closure at thirty minutes without supervisor approval. The other options describe permitted actions.
27. D — Still above normal but tapering toward normal. Traffic spikes for two hours and remains above normal into the third hour. Three hours in, traffic is still elevated and beginning to taper.
28. B — Secure the wallet and log it later. The emergency exception suspends the supervisor-call requirement and permits later logging regardless of value. The exception governs.
29. A — Fewer complaints than during outages. If complaints rise sharply when the elevator is out, they are lower when it works. The inverse of the observed pattern is the reasonable expectation.
30. C — A potential leak or hazardous condition is developing. The chemical smell, customer reactions, and hissing together signal a possible hazard. Recognition is the agent's first step.
31. C — Issue a written reference number and direct to customer service. The general rule routes unconfirmable disputes that are not visible double charges to the reference-number path. The double-charge exception does not apply here.
32. D — Platform filling faster than trains clear it. A growing crowd outpacing service is a clear deviation and a developing problem. The other options describe routine operations.
33. A — Refusing assistance because both are unavailable is inconsistent with the rule, which requires either personal assistance or a call for help in that situation. The other options describe rule-consistent actions.
34. D — End-of-school activity is associated with more lost cards. Reports cluster at the end of school days and not on holidays or weekends, pointing to that association. The conclusion stays within what the pattern supports.
35. D — Reporting a safety-critical defect by radio during a declared emergency. The emergency exception suspends defect reporting until the emergency ends. The other options describe rule-consistent actions.
36. A — Scheduled audio testing is most likely causing the silence. The silent PA, the posted notice, and the colleague's comment together point to testing. It is the conclusion consistent with every clue.
37. A — Customers bunching at one door while others stand empty. Uneven distribution at one door is the earliest sign boarding flow is faltering. The other options describe normal operations.
38. C — Grant the credit because the disruption waives the platform condition. The disruption exception waives the platform requirement, and the delay and description conditions are both met. The exception controls.
39. D — Water dripping onto a live electrical box. Liquid on energized equipment is an immediate hazard outranking the routine tasks. Safety takes priority.
40. B — Opening the gate for a customer with no accessibility need or large item. Outside an evacuation, the rule limits the gate's use to specific cases. The other options describe permitted cases.
41. A — A burning smell from the fare-machine panel. An abnormal burning smell is a clear sign something is wrong. The other options describe normal operations.
42. B — The reasoning supports option B (grant the courtesy re-entry because the disruption waives the time condition).
43. D — Leave the booth immediately to respond. The safety-emergency exception lets the agent leave during a declared emergency regardless of the transaction. The exception governs.

44. B — The unattended bag is the most pressing concern. An unattended bag is a security concern outranking the routine and service tasks. Security ranks above service-level issues here.
45. D — Stay calm, acknowledge, and explain the next step. De-escalation requires recognizing the feeling and providing a constructive path forward. Arguing, walking away, or matching tone fails the standard.
46. A — The single tap covers the train trip and the connecting bus transfer. OMNY includes a free bus transfer within the allowed window on a single tap. The other options misstate the policy.
47. A — Speak slowly, use simple words, draw on a map, and confirm understanding. Patient, multi-channel communication serves a customer with limited English. Sending the customer away or speaking faster does not help.
48. D — Politely decline and explain the official channel. The agent protects personal information while pointing the customer to the proper follow-up path. Providing the number or being rude is inappropriate.
49. B — Acknowledge the complexity and walk through the route step by step. Complex routes deserve a complete, patient explanation with a check for understanding. Dismissing or refusing the help fails the standard.
50. C — Answer the additional question courteously and accurately. Continued, helpful service is the standard, even after the thanks. Limiting questions or referring elsewhere fails it.
51. B — Listen, acknowledge, and explain the feedback channel. The professional response validates the concern and provides the path to follow up. Defending or dismissing the complaint is inappropriate.
52. B — Assist through the ADA-accessible gate with the packages. The accessible gate exists for customers who cannot use the turnstile, and assisting is the agent's duty. Sending the customer away is incorrect.
53. D — Lines, direction, transfer point, and confirmation. A complete transfer answer requires all four pieces. Partial answers leave the customer unable to finish the trip.
54. C — Acknowledge the frustration and explain the refund process calmly. De-escalation means recognizing the feeling and giving the proper process. Improvising a refund or arguing is wrong.
55. A — Eligible seniors, customers with qualifying disabilities, and eligible students. These are the standard reduced-fare groups. The other options describe people who do not automatically qualify.
56. C — Address each customer in turn, calmly and courteously. Sequential, polite service handles a rush professionally. Ignoring or dismissing customers fails the standard.
57. D — Observing and reporting overall station conditions and unusual occurrences. Monitoring and reporting are core agent duties. Setting signals, structural repairs, and operating trains fall outside the role.
58. B — Directing customers to safe exits and requesting the proper assistance. The agent's emergency role is guiding customers and calling for proper help, not repairing equipment or leaving the station. This keeps customers safe within the role.
59. C — Clearing a stray receipt jammed in a fare-card reader slot. Fingertip maintenance is light upkeep like clearing a fare-slot jam, which falls within the agent's duties. Replacing fixtures, rewiring, and repairing steps require maintenance staff.
60. D — Remain calm, acknowledge the issue, and explain the next step. Courtesy under hostility plus a clear path forward defines good service. Matching the customer's volume or walking away is unprofessional.

61. D — 3, 2, 4, 1. The 9:06 emergency goes first; within the 9:02 tie, the shorter task (quick question) precedes the long dispute; admin at 9:00 comes last because lower priority outranks earlier arrival here. Priority, then arrival, then shorter-task tie-breaker, fixes the order.
62. C — 1, 2, 3, 4, 5. Greet, verify eligibility, accept payment, add value, state the balance. This follows the transaction's natural sequence.
63. B — d, b, c, a. 10/01 entries come first (d at 09:00, then b at 16:00), then 10/02 entries at 09:30 sorted alphabetically by entry type ("Alert" before "Repair"). The three-tier sort fixes the order.
64. D — 1, 2, 3, 4. Confirm payment, open the gate, guide through, then close. The procedure follows the task's natural sequence.
65. B — R, Q, P, S. R, Q, and P all share high urgency and 9:00; among them, "Alarm" precedes "Cable" alphabetically, and within the "Alarm" tie, location 2 (R) precedes location 7 (Q). S has lower urgency and comes last.
66. C — 2, 3, 1, 4. Recognize the emergency, announce calmly, direct to exits, then request help. The order matches the emergency workflow.
67. A — 1, 2, 3, 4. Receive the wallet, note where and when found, log the description, then forward to lost property. This follows the handling workflow.
68. D — X, Z, Y, W. Ranked busiest to least (220, 140, 110, 95), the gates fall in this descending order. Reading the sort direction is essential.
69. D — R, Q, P. All arrived at 8:00; the spill (safety) goes first, then the shorter directions task, then the long fare dispute. The layered tie-breakers set the order.
70. C — 1, 2, 3, 4. Greet, confirm the failure and cause, open the gate, then advise resolving the balance. The sequence follows the interaction's logic.
71. D — W, V, U, T. The three Monday notices precede the Tuesday notice; within Monday, "Closure" (W, V) precedes "Detour" (U); within the "Closure" tie, location 4 (W) precedes location 9 (V). The four-tier sort fixes the order.
72. D — \$12.00, \$9.40, \$9.05, \$2.15. Sorted highest to lowest, the balances fall in this order. Comparing the close decimals carefully avoids misordering.
73. C — Pine, Elm, Center, Maple, Oak. Listing from last to first reverses the travel order. Respecting the reversed direction gives the sequence.
74. C — 1, 2, 3, 4. Receive and confirm, note location and time, submit, then log the submission. This follows the routine maintenance workflow.
75. B — \$19.40. The \$10.00 add plus 10% bonus equals \$11.00 added to the \$20.00 starting balance for \$31.00, then four rides at \$2.90 total \$11.60, leaving \$19.40. Working the steps in order yields the new balance.
76. A — \$30.00. Working backward from the \$33.00 total, $\$33.00 \div 1.10 = \30.00 added before the 10% bonus. Dividing the post-bonus balance by 1.10 inverts the bonus.
77. A — \$7.40. Four rides at \$2.90 cost \$11.60, plus the \$1.00 fee equals \$12.60; $\$20.00 - \12.60 leaves \$7.40. The change is the bill minus the total owed.
78. B — \$16.30. Three rides at \$2.90 cost \$8.70, leaving \$11.30 from \$20.00; adding \$5.00 gives \$16.30. Working the steps in order yields the new balance.
79. D — \$3.00. A 25% reduction of \$4.00 is \$1.00, leaving $\$4.00 - \$1.00 = \$3.00$. Subtracting the discount gives the reduced charge.
80. D — 30%. The card dropped by \$15.00 from \$50.00, and $15 \div 50 = 0.30$, or 30%. Dividing the amount used by the original gives the percentage.
81. C — \$26.50. Adding \$2.90, \$4.35, \$12.00, \$5.80, and \$1.45 totals \$26.50. Keeping the decimals aligned prevents an addition error.

82. B — \$44.00. A 10% bonus on \$40.00 adds \$4, for a total of \$44.00. Adding the bonus to the amount gives the card value.
83. C — 10 rides with \$0.00 remaining. Dividing \$25.00 by the \$2.50 fare gives exactly 10 full rides with no remainder. The exact division produces a whole number with zero balance.
84. A — 25%. Reports rose by 100 from 400, and $100 \div 400 = 0.25$, or 25%. Dividing the increase by the original value gives the percent increase.
85. C — East. Facing north, a right turn (90°) faces east; another right turn (90°) faces south; a left turn (90°) from south faces east. The left turn from south returns to east.
86. D — North. Walking east, a right turn faces south (walks south); another right turn faces west (walks west); another right turn faces north (walks north). The final leg is walked facing north.
87. D — The reasoning supports option D (transfer at Hill Rd from the green line to the red line, then ride east to Lake Pl). The red line crosses the green line only at Hill Rd, so the transfer must occur there..
88. B — South. The customer transferred to the green line traveling south; the direction follows directly from the transfer's stated heading. The map's north-south orientation fixes the direction.
89. A — Yellow north to Lake Pl, transfer west on red to Hill Rd, transfer south on green to Bay Ave. The map shows no direct line between Shore and Bay Ave; this two-transfer path is the only valid route. The other options describe non-existent connections.
90. B — Right. The exit lies to the north; a customer facing west sees north on their right. The fixed exit appears on the right from the customer's facing direction.
91. D — West. Facing north, three right turns yield east \rightarrow south \rightarrow west. Working each turn in order returns west as the final facing.
92. C — 3:00. A mirror reverses left and right around the vertical axis, so hands that look like 9:00 in a reflection are actually at 3:00 ($12 - 9 = 3$). The reflection maps the 9-position to the 3-position.
93. C — Booth 3 between 11:00 AM and 1:00 PM. The remembered assignment places Agent Lee at booth 3 during that window, and 12:30 PM falls inside it. Recalling the time-banded assignment gives the answer.
94. A — The rush special at 3:05. Among the four departures (3:05, 3:08, 3:10, 3:14), 3:05 is earliest. Holding all four times identifies the first to leave.
95. B — The Blue line near Pine St. The notice places weekend Blue-line work at Pine St only. Matching the location to the remembered schedule gives the answer.
96. C — Fir. Counting forward from Cedar: Dale (one after), Elm (two after), Fir (three after). Reading the sequence carefully fixes the stop three after Cedar.
97. A — Down. Rotating a right-pointing arrow 90 degrees counterclockwise yields an up-pointing arrow, and a vertical flip (top-bottom) reverses it to point down. Performing the two operations in order produces a down-pointing arrow.
98. A — TIXE, the letters reversed in order. A mirror reverses the order of letters, so "EXIT" appears as "TIXE." The reversal applies to the sequence of characters.
99. C — Y, Z, V, W, X. Each box shifts two to the right; Y and Z wrap to the front in order, leaving Y, Z, V, W, X. Performing the shift produces the new arrangement.
100. B — Down. Rotating a T-piece with its long arm up by 180 degrees turns the long arm to point down. A half-turn reverses each arm's direction.
