

PRACTICE EXAM 11: NAMSS CPCS SIMULATION (150 QUESTIONS)

This practice exam contains 150 multiple-choice questions aligned to the 2026 NAMSS CPCS content outline. Allow three hours for the two-part simulation. Select the single best answer for each item. An optional 15-minute break may be taken between parts. The official CPCS passing standard is a scaled score of 400; this independent practice exam is not an official NAMSS examination.

1. During a weekly credentialing queue review, the team encounters a record where an application contains an unexplained work-history gap. What disposition should be assigned?
 - A. Obtain a written explanation before treating the file as complete
 - B. accept the signed application as sufficient with documented follow-up
 - C. ask a peer to estimate the missing period
 - D. defer the issue until reappointment while preserving the audit record

2. A procedure crosswalk is prepared for a workflow in which an application contains an unexplained work-history gap. Which requirement should the crosswalk identify?
 - A. Allow staff to accept the signed application as sufficient under the approved workflow
 - B. Allow staff to ask a peer to estimate the missing period
 - C. Allow staff to defer the issue until reappointment through authorized escalation
 - D. Require staff to obtain a written explanation before treating the file as complete

3. A second-level reviewer examines a file after staff report that an application contains an unexplained work-history gap. Which confirmation is necessary before approval?
 - A. Confirm staff accept the signed application as sufficient under the approved workflow and document the final disposition
 - B. Confirm staff ask a peer to estimate the missing period with documented follow-up

- C. Confirm staff defer the issue until reappointment through authorized escalation and document the final disposition
- D. Confirm staff obtain a written explanation before treating the file as complete and documented the disposition

4. An annual control attestation covers files in which an application contains an unexplained work-history gap. Which evidence best supports signing the attestation?

- A. Sample results show staff obtain a written explanation before treating the file as complete and retained supporting evidence
- B. Sample results show staff accept the signed application as sufficient with documented follow-up
- C. Sample results show staff ask a peer to estimate the missing period through authorized escalation
- D. Sample results show staff defer the issue until reappointment while preserving the audit record

5. During a weekly credentialing queue review, the team encounters a record where a practitioner reports an active state license. What disposition should be assigned?

- A. accept a practitioner-supplied copy under the approved workflow
- B. use the curriculum vitae as verification with documented follow-up
- C. Verify current status directly with the issuing board
- D. ask another hospital to confirm the copy while preserving the audit record

6. A procedure crosswalk is prepared for a workflow in which a practitioner reports an active state license. Which requirement should the crosswalk identify?

- A. Allow staff to accept a practitioner-supplied copy under the approved workflow
- B. Require staff to verify current status directly with the issuing board
- C. Allow staff to use the curriculum vitae as verification
- D. Allow staff to ask another hospital to confirm the copy

7. A second-level reviewer examines a file after staff report that a practitioner reports an active state license. Which confirmation is necessary before approval?

- A. Confirm staff accept a practitioner-supplied copy under the approved workflow and document the final disposition
- B. Confirm staff verify current status directly with the issuing board and documented the disposition
- C. Confirm staff use the curriculum vitae as verification through authorized escalation and document the final disposition
- D. Confirm staff ask another hospital to confirm the copy while preserving the audit record

8. An annual control attestation covers files in which a practitioner reports an active state license. Which evidence best supports signing the attestation?

- A. Sample results show staff verify current status directly with the issuing board and retained supporting evidence
- B. Sample results show staff accept a practitioner-supplied copy with documented follow-up and document the final disposition
- C. Sample results show staff use the curriculum vitae as verification through authorized escalation
- D. Sample results show staff ask another hospital to confirm the copy while preserving the audit record

9. During a weekly credentialing queue review, the team encounters a record where a diploma copy is the only evidence of medical education. What disposition should be assigned?

- A. treat the copy as primary-source verification under the approved workflow
- B. have the department chair authenticate it with documented follow-up
- C. Verify education with the school or an accepted equivalent source
- D. replace education verification with a reference while preserving the audit record

10. A procedure crosswalk is prepared for a workflow in which a diploma copy is the only evidence of medical education. Which requirement should the crosswalk identify?

- A. Allow staff to treat the copy as primary-source verification under the approved workflow
- B. Allow staff to have the department chair authenticate it with documented follow-up
- C. Allow staff to replace education verification with a reference through authorized escalation

D. Require staff to verify education with the school or an accepted equivalent source

11. A second-level reviewer examines a file after staff report that a diploma copy is the only evidence of medical education. Which confirmation is necessary before approval?

A. Confirm staff treat the copy as primary-source verification under the approved workflow and document the final disposition

B. Confirm staff have the department chair authenticate it with documented follow-up and document the final disposition

C. Confirm staff replace education verification with a reference through authorized escalation and document the final disposition

D. Confirm staff verify education with the school or an accepted equivalent source and documented the disposition

12. An annual control attestation covers files in which a diploma copy is the only evidence of medical education. Which evidence best supports signing the attestation?

A. Sample results show staff verify education with the school or an accepted equivalent source and retained supporting evidence

B. Sample results show staff treat the copy as primary-source verification with documented follow-up

C. Sample results show staff have the department chair authenticate it through authorized escalation

D. Sample results show staff replace education verification with a reference while preserving the audit record

13. During a weekly credentialing queue review, the team encounters a record where requested privileges exceed documented training. What disposition should be assigned?

A. grant the privileges based on appointment eligibility under the approved workflow

B. Obtain evidence of training and current competence for the requested scope

C. approve them until the next cycle through authorized escalation

D. rely only on workforce need while preserving the audit record

14. A procedure crosswalk is prepared for a workflow in which requested privileges exceed documented training. Which requirement should the crosswalk identify?

- A. Allow staff to grant the privileges based on appointment eligibility under the approved workflow
- B. Allow staff to approve them until the next cycle with documented follow-up
- C. Require staff to obtain evidence of training and current competence for the requested scope
- D. Allow staff to rely only on workforce need while preserving the audit record

15. A second-level reviewer examines a file after staff report that requested privileges exceed documented training. Which confirmation is necessary before approval?

- A. Confirm staff grant the privileges based on appointment eligibility under the approved workflow
- B. Confirm staff obtain evidence of training and current competence for the requested scope and documented the disposition
- C. Confirm staff approve them until the next cycle through authorized escalation and document the final disposition
- D. Confirm staff rely only on workforce need while preserving the audit record and document the final disposition

16. An annual control attestation covers files in which requested privileges exceed documented training. Which evidence best supports signing the attestation?

- A. Sample results show staff grant the privileges based on appointment eligibility under the approved workflow
- B. Sample results show staff approve them until the next cycle with documented follow-up
- C. Sample results show staff obtain evidence of training and current competence for the requested scope and retained supporting evidence
- D. Sample results show staff rely only on workforce need while preserving the audit record

17. During a weekly credentialing queue review, the team encounters a record where a reappointment file shows an expired required license. What disposition should be assigned?

- A. use the license verified at initial appointment under the approved workflow
- B. approve first and verify afterward with documented follow-up
- C. substitute board certification for licensure through authorized escalation
- D. Resolve current licensure and apply policy before favorable action

18. A procedure crosswalk is prepared for a workflow in which a reappointment file shows an expired required license. Which requirement should the crosswalk identify?

- A. Require staff to resolve current licensure and apply policy before favorable action
- B. Allow staff to use the license verified at initial appointment
- C. Allow staff to approve first and verify afterward through authorized escalation
- D. Allow staff to substitute board certification for licensure while preserving the audit record

19. A second-level reviewer examines a file after staff report that a reappointment file shows an expired required license. Which confirmation is necessary before approval?

- A. Confirm staff resolve current licensure and apply policy before favorable action and documented the disposition
- B. Confirm staff use the license verified at initial appointment with documented follow-up and document the final disposition
- C. Confirm staff approve first and verify afterward through authorized escalation and document the final disposition
- D. Confirm staff substitute board certification for licensure while preserving the audit record and document the final disposition

20. An annual control attestation covers files in which a reappointment file shows an expired required license. Which evidence best supports signing the attestation?

- A. Sample results show staff use the license verified at initial appointment under the approved workflow
- B. Sample results show staff approve first and verify afterward with documented follow-up and document the final disposition
- C. Sample results show staff resolve current licensure and apply policy before favorable action and retained supporting evidence

D. Sample results show staff substitute board certification for licensure while preserving the audit record

21. During a weekly credentialing queue review, the team encounters a record where two sources report conflicting malpractice histories. What disposition should be assigned?

- A. use the newest response without comparison under the approved workflow
- B. Reconcile the discrepancy with authoritative information and practitioner clarification
- C. delete the unfavorable response through authorized escalation and document the final disposition
- D. send the unresolved packet to the committee while preserving the audit record

22. A procedure crosswalk is prepared for a workflow in which two sources report conflicting malpractice histories. Which requirement should the crosswalk identify?

- A. Allow staff to use the newest response without comparison under the approved workflow
- B. Allow staff to delete the unfavorable response with documented follow-up
- C. Allow staff to send the unresolved packet to the committee
- D. Require staff to reconcile the discrepancy with authoritative information and practitioner clarification

23. A second-level reviewer examines a file after staff report that two sources report conflicting malpractice histories. Which confirmation is necessary before approval?

- A. Confirm staff reconcile the discrepancy with authoritative information and practitioner clarification and documented the disposition
- B. Confirm staff use the newest response without comparison with documented follow-up and document the final disposition
- C. Confirm staff delete the unfavorable response through authorized escalation and document the final disposition
- D. Confirm staff send the unresolved packet to the committee while preserving the audit record

24. An annual control attestation covers files in which two sources report conflicting malpractice histories. Which evidence best supports signing the attestation?

- A. Sample results show staff use the newest response without comparison under the approved workflow
- B. Sample results show staff delete the unfavorable response with documented follow-up and document the final disposition
- C. Sample results show staff reconcile the discrepancy with authoritative information and practitioner clarification and retained supporting evidence
- D. Sample results show staff send the unresolved packet to the committee while preserving the audit record

25. During a weekly credentialing queue review, the team encounters a record where the application lacks a signed attestation. What disposition should be assigned?

- A. allow staff to sign for the applicant under the approved workflow
- B. treat ordinary email as an attestation with documented follow-up
- C. waive attestation after favorable references through authorized escalation
- D. Obtain the required signed and dated attestation while preserving the audit record

26. A procedure crosswalk is prepared for a workflow in which the application lacks a signed attestation. Which requirement should the crosswalk identify?

- A. Allow staff to allow staff to sign for the applicant
- B. Require staff to obtain the required signed and dated attestation
- C. Allow staff to treat ordinary email as an attestation
- D. Allow staff to waive attestation after favorable references

27. A second-level reviewer examines a file after staff report that the application lacks a signed attestation. Which confirmation is necessary before approval?

- A. Confirm staff obtain the required signed and dated attestation and documented the disposition
- B. Confirm staff allow staff to sign for the applicant with documented follow-up
- C. Confirm staff treat ordinary email as an attestation through authorized escalation
- D. Confirm staff waive attestation after favorable references while preserving the audit record

28. An annual control attestation covers files in which the application lacks a signed attestation. Which evidence best supports signing the attestation?

- A. Sample results show staff allow staff to sign for the applicant under the approved workflow
- B. Sample results show staff treat ordinary email as an attestation with documented follow-up
- C. Sample results show staff waive attestation after favorable references through authorized escalation and document the final disposition
- D. Sample results show staff obtain the required signed and dated attestation and retained supporting evidence

29. During a weekly credentialing queue review, the team encounters a record where specialty-board certification must be confirmed. What disposition should be assigned?

- A. rely on a photograph of the certificate under the approved workflow
- B. Query the board or its officially designated verification source
- C. accept the claim on the resume through authorized escalation
- D. ask a colleague in the specialty while preserving the audit record

30. A procedure crosswalk is prepared for a workflow in which specialty-board certification must be confirmed. Which requirement should the crosswalk identify?

- A. Allow staff to rely on a photograph of the certificate
- B. Allow staff to accept the claim on the resume with documented follow-up
- C. Require staff to query the board or its officially designated verification source
- D. Allow staff to ask a colleague in the specialty while preserving the audit record

31. A second-level reviewer examines a file after staff report that specialty-board certification must be confirmed. Which confirmation is necessary before approval?

- A. Confirm staff query the board or its officially designated verification source and documented the disposition

- B. Confirm staff rely on a photograph of the certificate with documented follow-up and document the final disposition
- C. Confirm staff accept the claim on the resume through authorized escalation and document the final disposition
- D. Confirm staff ask a colleague in the specialty while preserving the audit record

32. An annual control attestation covers files in which specialty-board certification must be confirmed. Which evidence best supports signing the attestation?

- A. Sample results show staff rely on a photograph of the certificate under the approved workflow
- B. Sample results show staff query the board or its officially designated verification source and retained supporting evidence
- C. Sample results show staff accept the claim on the resume through authorized escalation
- D. Sample results show staff ask a colleague in the specialty while preserving the audit record

33. During a weekly credentialing queue review, the team encounters a record where a prior hospital affiliation is listed. What disposition should be assigned?

- A. assume good standing from silence under the approved workflow
- B. use an internet directory alone with documented follow-up
- C. Verify affiliation and relevant history with an accepted source
- D. omit an out-of-state affiliation while preserving the audit record

34. A procedure crosswalk is prepared for a workflow in which a prior hospital affiliation is listed. Which requirement should the crosswalk identify?

- A. Allow staff to assume good standing from silence under the approved workflow
- B. Allow staff to use an internet directory alone with documented follow-up
- C. Allow staff to omit an out-of-state affiliation through authorized escalation
- D. Require staff to verify affiliation and relevant history with an accepted source

35. A second-level reviewer examines a file after staff report that a prior hospital affiliation is listed. Which confirmation is necessary before approval?

- A. Confirm staff assume good standing from silence under the approved workflow and document the final disposition
- B. Confirm staff use an internet directory alone with documented follow-up and document the final disposition
- C. Confirm staff verify affiliation and relevant history with an accepted source and documented the disposition
- D. Confirm staff omit an out-of-state affiliation while preserving the audit record and document the final disposition

36. An annual control attestation covers files in which a prior hospital affiliation is listed. Which evidence best supports signing the attestation?

- A. Sample results show staff assume good standing from silence under the approved workflow
- B. Sample results show staff use an internet directory alone with documented follow-up and document the final disposition
- C. Sample results show staff omit an out-of-state affiliation through authorized escalation and document the final disposition
- D. Sample results show staff verify affiliation and relevant history with an accepted source and retained supporting evidence

37. During a weekly credentialing queue review, the team encounters a record where a committee packet is incomplete. What disposition should be assigned?

- A. Defer the file until required elements are complete
- B. recommend approval from favorable items with documented follow-up
- C. replace missing evidence with oral assurance through authorized escalation
- D. let the applicant waive the requirements while preserving the audit record

38. A procedure crosswalk is prepared for a workflow in which a committee packet is incomplete. Which requirement should the crosswalk identify?

- A. Allow staff to recommend approval from favorable items under the approved workflow
- B. Require staff to defer the file until required elements are complete
- C. Allow staff to replace missing evidence with oral assurance
- D. Allow staff to let the applicant waive the requirements

39. A second-level reviewer examines a file after staff report that a committee packet is incomplete. Which confirmation is necessary before approval?

- A. Confirm staff defer the file until required elements are complete and documented the disposition
- B. Confirm staff recommend approval from favorable items with documented follow-up and document the final disposition
- C. Confirm staff replace missing evidence with oral assurance through authorized escalation and document the final disposition
- D. Confirm staff let the applicant waive the requirements while preserving the audit record

40. An annual control attestation covers files in which a committee packet is incomplete. Which evidence best supports signing the attestation?

- A. Sample results show staff recommend approval from favorable items under the approved workflow
- B. Sample results show staff defer the file until required elements are complete and retained supporting evidence
- C. Sample results show staff replace missing evidence with oral assurance through authorized escalation
- D. Sample results show staff let the applicant waive the requirements while preserving the audit record

41. During a weekly credentialing queue review, the team encounters a record where an applicant discloses disciplinary action. What disposition should be assigned?

- A. deny automatically without review under the approved workflow
- B. ignore the disclosure if the license is active
- C. Obtain authoritative details and evaluate them under policy
- D. change the response after a favorable interview while preserving the audit record

42. A procedure crosswalk is prepared for a workflow in which an applicant discloses disciplinary action. Which requirement should the crosswalk identify?

- A. Allow staff to deny automatically without review under the approved workflow
- B. Allow staff to ignore the disclosure if the license is active
- C. Allow staff to change the response after a favorable interview
- D. Require staff to obtain authoritative details and evaluate them under policy

43. A second-level reviewer examines a file after staff report that an applicant discloses disciplinary action. Which confirmation is necessary before approval?

- A. Confirm staff deny automatically without review under the approved workflow and document the final disposition
- B. Confirm staff ignore the disclosure if the license is active with documented follow-up
- C. Confirm staff obtain authoritative details and evaluate them under policy and documented the disposition
- D. Confirm staff change the response after a favorable interview while preserving the audit record

44. An annual control attestation covers files in which an applicant discloses disciplinary action. Which evidence best supports signing the attestation?

- A. Sample results show staff obtain authoritative details and evaluate them under policy and retained supporting evidence
- B. Sample results show staff deny automatically without review with documented follow-up and document the final disposition
- C. Sample results show staff ignore the disclosure if the license is active through authorized escalation
- D. Sample results show staff change the response after a favorable interview while preserving the audit record

45. During a weekly credentialing queue review, the team encounters a record where temporary privileges are requested for convenience. What disposition should be assigned?

- A. grant them whenever scheduling is difficult under the approved workflow
- B. treat them as automatic appointment with documented follow-up
- C. skip verification because duration is short through authorized escalation
- D. Apply the organization's limited temporary-privilege criteria while preserving the audit record

46. A procedure crosswalk is prepared for a workflow in which temporary privileges are requested for convenience. Which requirement should the crosswalk identify?

- A. Allow staff to grant them whenever scheduling is difficult
- B. Require staff to apply the organization's limited temporary-privilege criteria
- C. Allow staff to treat them as automatic appointment
- D. Allow staff to skip verification because duration is short

47. A second-level reviewer examines a file after staff report that temporary privileges are requested for convenience. Which confirmation is necessary before approval?

- A. Confirm staff grant them whenever scheduling is difficult under the approved workflow
- B. Confirm staff apply the organization's limited temporary-privilege criteria and documented the disposition
- C. Confirm staff treat them as automatic appointment through authorized escalation
- D. Confirm staff skip verification because duration is short while preserving the audit record

48. An annual control attestation covers files in which temporary privileges are requested for convenience. Which evidence best supports signing the attestation?

- A. Sample results show staff grant them whenever scheduling is difficult under the approved workflow
- B. Sample results show staff treat them as automatic appointment with documented follow-up
- C. Sample results show staff apply the organization's limited temporary-privilege criteria and retained supporting evidence
- D. Sample results show staff skip verification because duration is short while preserving the audit record

49. During a weekly credentialing queue review, the team encounters a record where a low-volume practitioner seeks reappointment. What disposition should be assigned?

- A. Use alternative competency evidence permitted by approved criteria
- B. assume competence from initial training with documented follow-up
- C. terminate membership solely for low volume through authorized escalation
- D. use age as a performance measure while preserving the audit record

50. A procedure crosswalk is prepared for a workflow in which a low-volume practitioner seeks reappointment. Which requirement should the crosswalk identify?

- A. Allow staff to assume competence from initial training under the approved workflow
- B. Allow staff to terminate membership solely for low volume
- C. Allow staff to use age as a performance measure
- D. Require staff to use alternative competency evidence permitted by approved criteria

51. A second-level reviewer examines a file after staff report that a low-volume practitioner seeks reappointment. Which confirmation is necessary before approval?

- A. Confirm staff use alternative competency evidence permitted by approved criteria and documented the disposition
- B. Confirm staff assume competence from initial training with documented follow-up and document the final disposition
- C. Confirm staff terminate membership solely for low volume through authorized escalation and document the final disposition
- D. Confirm staff use age as a performance measure while preserving the audit record

52. An annual control attestation covers files in which a low-volume practitioner seeks reappointment. Which evidence best supports signing the attestation?

- A. Sample results show staff assume competence from initial training under the approved workflow
- B. Sample results show staff terminate membership solely for low volume with documented follow-up

- C. Sample results show staff use age as a performance measure through authorized escalation
- D. Sample results show staff use alternative competency evidence permitted by approved criteria and retained supporting evidence

53. During a weekly credentialing queue review, the team encounters a record where an applicant amends a response after submission. What disposition should be assigned?

- A. replace the original without an audit trail under the approved workflow
- B. ignore the change until reappointment with documented follow-up
- C. Retain a dated amendment and evaluate the new information
- D. require an entirely blank new application while preserving the audit record

54. A procedure crosswalk is prepared for a workflow in which an applicant amends a response after submission. Which requirement should the crosswalk identify?

- A. Allow staff to replace the original without an audit trail
- B. Require staff to retain a dated amendment and evaluate the new information
- C. Allow staff to ignore the change until reappointment through authorized escalation
- D. Allow staff to require an entirely blank new application while preserving the audit record

55. A second-level reviewer examines a file after staff report that an applicant amends a response after submission. Which confirmation is necessary before approval?

- A. Confirm staff replace the original without an audit trail under the approved workflow
- B. Confirm staff ignore the change until reappointment with documented follow-up and document the final disposition
- C. Confirm staff require an entirely blank new application through authorized escalation and document the final disposition
- D. Confirm staff retain a dated amendment and evaluate the new information and documented the disposition

56. An annual control attestation covers files in which an applicant amends a response after submission. Which evidence best supports signing the attestation?

- A. Sample results show staff replace the original without an audit trail under the approved workflow
- B. Sample results show staff ignore the change until reappointment with documented follow-up and document the final disposition
- C. Sample results show staff retain a dated amendment and evaluate the new information and retained supporting evidence
- D. Sample results show staff require an entirely blank new application while preserving the audit record

57. During a weekly credentialing queue review, the team encounters a record where a CVO supplies a verification report. What disposition should be assigned?

- A. assume every external report is acceptable under the approved workflow
- B. Confirm the cvo's methods satisfy organizational acceptance criteria
- C. treat the report as committee approval through authorized escalation
- D. remove all internal quality controls while preserving the audit record

58. A procedure crosswalk is prepared for a workflow in which a CVO supplies a verification report. Which requirement should the crosswalk identify?

- A. Require staff to confirm the CVO's methods satisfy organizational acceptance criteria
- B. Allow staff to assume every external report is acceptable
- C. Allow staff to treat the report as committee approval
- D. Allow staff to remove all internal quality controls while preserving the audit record

59. A second-level reviewer examines a file after staff report that a CVO supplies a verification report. Which confirmation is necessary before approval?

- A. Confirm staff assume every external report is acceptable under the approved workflow
- B. Confirm staff confirm the CVO's methods satisfy organizational acceptance criteria and documented the disposition

- C. Confirm staff treat the report as committee approval through authorized escalation and document the final disposition
- D. Confirm staff remove all internal quality controls while preserving the audit record

60. An annual control attestation covers files in which a CVO supplies a verification report. Which evidence best supports signing the attestation?

- A. Sample results show staff assume every external report is acceptable under the approved workflow
- B. Sample results show staff treat the report as committee approval with documented follow-up
- C. Sample results show staff confirm the CVO's methods satisfy organizational acceptance criteria and retained supporting evidence
- D. Sample results show staff remove all internal quality controls while preserving the audit record

61. During a weekly credentialing queue review, the team encounters a record where a peer reference lists only acquaintance dates. What disposition should be assigned?

- A. count the returned form as sufficient under the approved workflow
- B. ask the applicant to summarize it with documented follow-up
- C. substitute a personal character reference through authorized escalation
- D. Seek relevant information about competence and professional performance

62. A procedure crosswalk is prepared for a workflow in which a peer reference lists only acquaintance dates. Which requirement should the crosswalk identify?

- A. Require staff to seek relevant information about competence and professional performance
- B. Allow staff to count the returned form as sufficient
- C. Allow staff to ask the applicant to summarize it
- D. Allow staff to substitute a personal character reference while preserving the audit record

63. A second-level reviewer examines a file after staff report that a peer reference lists only acquaintance dates. Which confirmation is necessary before approval?

- A. Confirm staff seek relevant information about competence and professional performance and documented the disposition
- B. Confirm staff count the returned form as sufficient with documented follow-up and document the final disposition
- C. Confirm staff ask the applicant to summarize it through authorized escalation and document the final disposition
- D. Confirm staff substitute a personal character reference while preserving the audit record

64. An annual control attestation covers files in which a peer reference lists only acquaintance dates. Which evidence best supports signing the attestation?

- A. Sample results show staff count the returned form as sufficient under the approved workflow
- B. Sample results show staff ask the applicant to summarize it with documented follow-up
- C. Sample results show staff seek relevant information about competence and professional performance and retained supporting evidence
- D. Sample results show staff substitute a personal character reference while preserving the audit record

65. During a weekly credentialing queue review, the team encounters a record where names differ across verification responses. What disposition should be assigned?

- A. assume every record belongs to the applicant under the approved workflow
- B. discard records using a former name with documented follow-up
- C. create a separate practitioner file through authorized escalation
- D. Resolve identity with documented name history and reliable identifiers

66. A procedure crosswalk is prepared for a workflow in which names differ across verification responses. Which requirement should the crosswalk identify?

- A. Allow staff to assume every record belongs to the applicant
- B. Require staff to resolve identity with documented name history and reliable identifiers
- C. Allow staff to discard records using a former name through authorized escalation
- D. Allow staff to create a separate practitioner file while preserving the audit record

67. A second-level reviewer examines a file after staff report that names differ across verification responses. Which confirmation is necessary before approval?

- A. Confirm staff resolve identity with documented name history and reliable identifiers and documented the disposition
- B. Confirm staff assume every record belongs to the applicant with documented follow-up and document the final disposition
- C. Confirm staff discard records using a former name through authorized escalation and document the final disposition
- D. Confirm staff create a separate practitioner file while preserving the audit record and document the final disposition

68. An annual control attestation covers files in which names differ across verification responses. Which evidence best supports signing the attestation?

- A. Sample results show staff assume every record belongs to the applicant under the approved workflow
- B. Sample results show staff resolve identity with documented name history and reliable identifiers and retained supporting evidence
- C. Sample results show staff discard records using a former name through authorized escalation
- D. Sample results show staff create a separate practitioner file while preserving the audit record

69. During a weekly credentialing queue review, the team encounters a record where a practitioner refuses required information authorization. What disposition should be assigned?

- A. approve from the resume under the approved workflow
- B. invent substitute credentials with documented follow-up and document the final disposition
- C. ignore authorization restrictions through authorized escalation and document the final disposition
- D. Follow policy for an application that cannot be verified

70. A procedure crosswalk is prepared for a workflow in which a practitioner refuses required information authorization. Which requirement should the crosswalk identify?

- A. Allow staff to approve from the resume under the approved workflow
- B. Allow staff to invent substitute credentials with documented follow-up and document the final disposition
- C. Require staff to follow policy for an application that cannot be verified
- D. Allow staff to ignore authorization restrictions while preserving the audit record

71. A second-level reviewer examines a file after staff report that a practitioner refuses required information authorization. Which confirmation is necessary before approval?

- A. Confirm staff approve from the resume under the approved workflow and document the final disposition
- B. Confirm staff invent substitute credentials with documented follow-up and document the final disposition
- C. Confirm staff follow policy for an application that cannot be verified and documented the disposition
- D. Confirm staff ignore authorization restrictions while preserving the audit record and document the final disposition

72. An annual control attestation covers files in which a practitioner refuses required information authorization. Which evidence best supports signing the attestation?

- A. Sample results show staff approve from the resume under the approved workflow and document the final disposition
- B. Sample results show staff follow policy for an application that cannot be verified and retained supporting evidence
- C. Sample results show staff invent substitute credentials through authorized escalation and document the final disposition
- D. Sample results show staff ignore authorization restrictions while preserving the audit record and document the final disposition

73. During a weekly credentialing queue review, the team encounters a record where an adverse NPDB report is received. What disposition should be assigned?

- A. Evaluate it with the practitioner's explanation and relevant evidence

- B. deny every privilege automatically with documented follow-up and document the final disposition
- C. remove the report after printing through authorized escalation
- D. ignore it because it was disclosed while preserving the audit record

74. A procedure crosswalk is prepared for a workflow in which an adverse NPDB report is received. Which requirement should the crosswalk identify?

- A. Allow staff to deny every privilege automatically under the approved workflow
- B. Allow staff to remove the report after printing with documented follow-up
- C. Allow staff to ignore it because it was disclosed through authorized escalation
- D. Require staff to evaluate it with the practitioner's explanation and relevant evidence

75. A second-level reviewer examines a file after staff report that an adverse NPDB report is received. Which confirmation is necessary before approval?

- A. Confirm staff deny every privilege automatically under the approved workflow and document the final disposition
- B. Confirm staff remove the report after printing with documented follow-up and document the final disposition
- C. Confirm staff evaluate it with the practitioner's explanation and relevant evidence and documented the disposition
- D. Confirm staff ignore it because it was disclosed while preserving the audit record

76. An annual control attestation covers files in which an adverse NPDB report is received. Which evidence best supports signing the attestation?

- A. Sample results show staff deny every privilege automatically under the approved workflow and document the final disposition
- B. Sample results show staff remove the report after printing with documented follow-up and document the final disposition
- C. Sample results show staff ignore it because it was disclosed through authorized escalation
- D. Sample results show staff evaluate it with the practitioner's explanation and relevant evidence and retained supporting evidence

77. During a weekly credentialing queue review, the team encounters a record where a current appointee requests a new privilege. What disposition should be assigned?

- A. add it because membership is current under the approved workflow
- B. Process the request under approved criteria and competency requirements
- C. wait automatically until reappointment through authorized escalation and document the final disposition
- D. allow practice before review while preserving the audit record

78. A procedure crosswalk is prepared for a workflow in which a current appointee requests a new privilege. Which requirement should the crosswalk identify?

- A. Require staff to process the request under approved criteria and competency requirements
- B. Allow staff to add it because membership is current with documented follow-up
- C. Allow staff to wait automatically until reappointment through authorized escalation
- D. Allow staff to allow practice before review while preserving the audit record

79. A second-level reviewer examines a file after staff report that a current appointee requests a new privilege. Which confirmation is necessary before approval?

- A. Confirm staff process the request under approved criteria and competency requirements and documented the disposition
- B. Confirm staff add it because membership is current with documented follow-up and document the final disposition
- C. Confirm staff wait automatically until reappointment through authorized escalation and document the final disposition
- D. Confirm staff allow practice before review while preserving the audit record and document the final disposition

80. An annual control attestation covers files in which a current appointee requests a new privilege. Which evidence best supports signing the attestation?

- A. Sample results show staff add it because membership is current under the approved workflow
- B. Sample results show staff process the request under approved criteria and competency requirements and retained supporting evidence
- C. Sample results show staff wait automatically until reappointment through authorized escalation and document the final disposition
- D. Sample results show staff allow practice before review while preserving the audit record

81. During a weekly credentialing queue review, the team encounters a record where a training program does not answer verification requests. What disposition should be assigned?

- A. record training as verified without qualification under the approved workflow
- B. delete the training requirement with documented follow-up and document the final disposition
- C. Use an accepted equivalent source if permitted and document all efforts
- D. accept the diploma as automatically equivalent while preserving the audit record

82. A procedure crosswalk is prepared for a workflow in which a training program does not answer verification requests. Which requirement should the crosswalk identify?

- A. Allow staff to record training as verified without qualification under the approved workflow
- B. Allow staff to delete the training requirement with documented follow-up and document the final disposition
- C. Allow staff to accept the diploma as automatically equivalent through authorized escalation
- D. Require staff to use an accepted equivalent source if permitted and document all efforts

83. A second-level reviewer examines a file after staff report that a training program does not answer verification requests. Which confirmation is necessary before approval?

- A. Confirm staff record training as verified without qualification under the approved workflow and document the final disposition
- B. Confirm staff delete the training requirement with documented follow-up and document the final disposition

- C. Confirm staff use an accepted equivalent source if permitted and document all efforts and documented the disposition
- D. Confirm staff accept the diploma as automatically equivalent while preserving the audit record

84. An annual control attestation covers files in which a training program does not answer verification requests. Which evidence best supports signing the attestation?

- A. Sample results show staff record training as verified without qualification under the approved workflow
- B. Sample results show staff delete the training requirement with documented follow-up and document the final disposition
- C. Sample results show staff accept the diploma as automatically equivalent through authorized escalation
- D. Sample results show staff use an accepted equivalent source if permitted and document all efforts and retained supporting evidence

85. During a weekly credentialing queue review, the team encounters a record where a department chair recommends an exception to privilege criteria. What disposition should be assigned?

- A. treat the chair's recommendation as final under the approved workflow
- B. Route the exception through the adopted approval process
- C. rewrite criteria in the applicant's file through authorized escalation
- D. ignore evidence of current competence while preserving the audit record

86. A procedure crosswalk is prepared for a workflow in which a department chair recommends an exception to privilege criteria. Which requirement should the crosswalk identify?

- A. Require staff to route the exception through the adopted approval process
- B. Allow staff to treat the chair's recommendation as final
- C. Allow staff to rewrite criteria in the applicant's file
- D. Allow staff to ignore evidence of current competence while preserving the audit record

87. A second-level reviewer examines a file after staff report that a department chair recommends an exception to privilege criteria. Which confirmation is necessary before approval?

- A. Confirm staff treat the chair's recommendation as final under the approved workflow
- B. Confirm staff rewrite criteria in the applicant's file with documented follow-up and document the final disposition
- C. Confirm staff route the exception through the adopted approval process and documented the disposition
- D. Confirm staff ignore evidence of current competence while preserving the audit record

88. An annual control attestation covers files in which a department chair recommends an exception to privilege criteria. Which evidence best supports signing the attestation?

- A. Sample results show staff treat the chair's recommendation as final under the approved workflow
- B. Sample results show staff rewrite criteria in the applicant's file with documented follow-up
- C. Sample results show staff ignore evidence of current competence through authorized escalation and document the final disposition
- D. Sample results show staff route the exception through the adopted approval process and retained supporting evidence

89. During a weekly credentialing queue review, the team encounters a record where a committee member has a conflict involving an applicant. What disposition should be assigned?

- A. allow the member to lead discussion under the approved workflow
- B. Apply the conflict policy and document appropriate recusal
- C. remove unfavorable evidence through authorized escalation and document the final disposition
- D. cancel all applications in the specialty while preserving the audit record

90. A procedure crosswalk is prepared for a workflow in which a committee member has a conflict involving an applicant. Which requirement should the crosswalk identify?

- A. Allow staff to allow the member to lead discussion

- B. Require staff to apply the conflict policy and document appropriate recusal
- C. Allow staff to remove unfavorable evidence through authorized escalation
- D. Allow staff to cancel all applications in the specialty

91. A second-level reviewer examines a file after staff report that a committee member has a conflict involving an applicant. Which confirmation is necessary before approval?

- A. Confirm staff apply the conflict policy and document appropriate recusal and documented the disposition
- B. Confirm staff allow the member to lead discussion with documented follow-up and document the final disposition
- C. Confirm staff remove unfavorable evidence through authorized escalation and document the final disposition
- D. Confirm staff cancel all applications in the specialty while preserving the audit record

92. An annual control attestation covers files in which a committee member has a conflict involving an applicant. Which evidence best supports signing the attestation?

- A. Sample results show staff allow the member to lead discussion under the approved workflow
- B. Sample results show staff remove unfavorable evidence with documented follow-up and document the final disposition
- C. Sample results show staff cancel all applications in the specialty through authorized escalation
- D. Sample results show staff apply the conflict policy and document appropriate recusal and retained supporting evidence

93. During a weekly credentialing queue review, the team encounters a record where a licensing board posts a new sanction. What disposition should be assigned?

- A. wait until reappointment under the approved workflow and document the final disposition
- B. remove the practitioner without review with documented follow-up
- C. Start the defined monitoring review and notify authorized leaders
- D. ask the practitioner to verify the board while preserving the audit record

94. A procedure crosswalk is prepared for a workflow in which a licensing board posts a new sanction. Which requirement should the crosswalk identify?

- A. Require staff to start the defined monitoring review and notify authorized leaders
- B. Allow staff to wait until reappointment with documented follow-up and document the final disposition
- C. Allow staff to remove the practitioner without review through authorized escalation
- D. Allow staff to ask the practitioner to verify the board

95. A second-level reviewer examines a file after staff report that a licensing board posts a new sanction. Which confirmation is necessary before approval?

- A. Confirm staff wait until reappointment under the approved workflow and document the final disposition
- B. Confirm staff remove the practitioner without review with documented follow-up and document the final disposition
- C. Confirm staff ask the practitioner to verify the board through authorized escalation and document the final disposition
- D. Confirm staff start the defined monitoring review and notify authorized leaders and documented the disposition

96. An annual control attestation covers files in which a licensing board posts a new sanction. Which evidence best supports signing the attestation?

- A. Sample results show staff start the defined monitoring review and notify authorized leaders and retained supporting evidence
- B. Sample results show staff wait until reappointment with documented follow-up and document the final disposition
- C. Sample results show staff remove the practitioner without review through authorized escalation and document the final disposition
- D. Sample results show staff ask the practitioner to verify the board while preserving the audit record

97. During a weekly credentialing queue review, the team encounters a record where a required license expires next month. What disposition should be assigned?

- A. mark it renewed before evidence arrives under the approved workflow
- B. wait for the practitioner to remember with documented follow-up
- C. Notify responsible parties and track verified renewal through authorized escalation
- D. replace it with a peer reference while preserving the audit record

98. A procedure crosswalk is prepared for a workflow in which a required license expires next month. Which requirement should the crosswalk identify?

- A. Allow staff to mark it renewed before evidence arrives
- B. Require staff to notify responsible parties and track verified renewal
- C. Allow staff to wait for the practitioner to remember
- D. Allow staff to replace it with a peer reference

99. A second-level reviewer examines a file after staff report that a required license expires next month. Which confirmation is necessary before approval?

- A. Confirm staff mark it renewed before evidence arrives under the approved workflow
- B. Confirm staff notify responsible parties and track verified renewal and documented the disposition
- C. Confirm staff wait for the practitioner to remember through authorized escalation
- D. Confirm staff replace it with a peer reference while preserving the audit record

100. An annual control attestation covers files in which a required license expires next month. Which evidence best supports signing the attestation?

- A. Sample results show staff notify responsible parties and track verified renewal and retained supporting evidence
- B. Sample results show staff mark it renewed before evidence arrives with documented follow-up
- C. Sample results show staff wait for the practitioner to remember through authorized escalation
- D. Sample results show staff replace it with a peer reference while preserving the audit record

101. During a weekly credentialing queue review, the team encounters a record where repeated patient complaints show a pattern. What disposition should be assigned?

- A. keep every complaint isolated under the approved workflow
- B. delete complaints without lawsuits with documented follow-up and document the final disposition
- C. terminate appointment automatically through authorized escalation and document the final disposition
- D. Aggregate and route the pattern through the approved review process

102. A procedure crosswalk is prepared for a workflow in which repeated patient complaints show a pattern. Which requirement should the crosswalk identify?

- A. Allow staff to keep every complaint isolated under the approved workflow
- B. Allow staff to delete complaints without lawsuits with documented follow-up and document the final disposition
- C. Require staff to aggregate and route the pattern through the approved review process
- D. Allow staff to terminate appointment automatically while preserving the audit record

103. A second-level reviewer examines a file after staff report that repeated patient complaints show a pattern. Which confirmation is necessary before approval?

- A. Confirm staff keep every complaint isolated under the approved workflow and document the final disposition
- B. Confirm staff delete complaints without lawsuits with documented follow-up and document the final disposition
- C. Confirm staff terminate appointment automatically through authorized escalation and document the final disposition
- D. Confirm staff aggregate and route the pattern through the approved review process and documented the disposition

104. An annual control attestation covers files in which repeated patient complaints show a pattern. Which evidence best supports signing the attestation?

- A. Sample results show staff aggregate and route the pattern through the approved review process and retained supporting evidence
- B. Sample results show staff keep every complaint isolated with documented follow-up and document the final disposition
- C. Sample results show staff delete complaints without lawsuits through authorized escalation and document the final disposition
- D. Sample results show staff terminate appointment automatically while preserving the audit record and document the final disposition

105. During a weekly credentialing queue review, the team encounters a record where OPPE data show a negative trend. What disposition should be assigned?

- A. hide the data until reappointment under the approved workflow
- B. have clerical staff diagnose the cause with documented follow-up
- C. Escalate the trend for authorized clinical review through authorized escalation
- D. change the measure to improve results while preserving the audit record

106. A procedure crosswalk is prepared for a workflow in which OPPE data show a negative trend. Which requirement should the crosswalk identify?

- A. Allow staff to hide the data until reappointment
- B. Require staff to escalate the trend for authorized clinical review
- C. Allow staff to have clerical staff diagnose the cause
- D. Allow staff to change the measure to improve results

107. A second-level reviewer examines a file after staff report that OPPE data show a negative trend. Which confirmation is necessary before approval?

- A. Confirm staff hide the data until reappointment under the approved workflow
- B. Confirm staff have clerical staff diagnose the cause with documented follow-up
- C. Confirm staff escalate the trend for authorized clinical review and documented the disposition

D. Confirm staff change the measure to improve results while preserving the audit record

108. An annual control attestation covers files in which OPPE data show a negative trend. Which evidence best supports signing the attestation?

- A. Sample results show staff hide the data until reappointment under the approved workflow
- B. Sample results show staff escalate the trend for authorized clinical review and retained supporting evidence
- C. Sample results show staff have clerical staff diagnose the cause through authorized escalation
- D. Sample results show staff change the measure to improve results while preserving the audit record

109. During a weekly credentialing queue review, the team encounters a record where a practitioner changes malpractice carriers. What disposition should be assigned?

- A. Verify updated coverage and revise expiration tracking under the approved workflow
- B. retain only the former certificate with documented follow-up
- C. assume identical new terms through authorized escalation and document the final disposition
- D. remove coverage from monitoring while preserving the audit record

110. A procedure crosswalk is prepared for a workflow in which a practitioner changes malpractice carriers. Which requirement should the crosswalk identify?

- A. Allow staff to retain only the former certificate
- B. Allow staff to assume identical new terms with documented follow-up
- C. Allow staff to remove coverage from monitoring through authorized escalation
- D. Require staff to verify updated coverage and revise expiration tracking

111. A second-level reviewer examines a file after staff report that a practitioner changes malpractice carriers. Which confirmation is necessary before approval?

- A. Confirm staff verify updated coverage and revise expiration tracking and documented the disposition

- B. Confirm staff retain only the former certificate with documented follow-up and document the final disposition
- C. Confirm staff assume identical new terms through authorized escalation and document the final disposition
- D. Confirm staff remove coverage from monitoring while preserving the audit record

112. An annual control attestation covers files in which a practitioner changes malpractice carriers. Which evidence best supports signing the attestation?

- A. Sample results show staff retain only the former certificate under the approved workflow
- B. Sample results show staff assume identical new terms with documented follow-up and document the final disposition
- C. Sample results show staff verify updated coverage and revise expiration tracking and retained supporting evidence
- D. Sample results show staff remove coverage from monitoring while preserving the audit record

113. During a weekly credentialing queue review, the team encounters a record where a sanctions query returns a possible name match. What disposition should be assigned?

- A. confirm every similar name under the approved workflow
- B. ignore matches without identical middle names with documented follow-up
- C. ask the practitioner to delete the source record
- D. Resolve identity before attributing the result while preserving the audit record

114. A procedure crosswalk is prepared for a workflow in which a sanctions query returns a possible name match. Which requirement should the crosswalk identify?

- A. Allow staff to confirm every similar name under the approved workflow
- B. Require staff to resolve identity before attributing the result
- C. Allow staff to ignore matches without identical middle names
- D. Allow staff to ask the practitioner to delete the source record

115. A second-level reviewer examines a file after staff report that a sanctions query returns a possible name match. Which confirmation is necessary before approval?

- A. Confirm staff confirm every similar name under the approved workflow
- B. Confirm staff ignore matches without identical middle names with documented follow-up
- C. Confirm staff resolve identity before attributing the result and documented the disposition
- D. Confirm staff ask the practitioner to delete the source record

116. An annual control attestation covers files in which a sanctions query returns a possible name match. Which evidence best supports signing the attestation?

- A. Sample results show staff confirm every similar name under the approved workflow
- B. Sample results show staff resolve identity before attributing the result and retained supporting evidence
- C. Sample results show staff ignore matches without identical middle names through authorized escalation
- D. Sample results show staff ask the practitioner to delete the source record

117. During a weekly credentialing queue review, the team encounters a record where FPPE is assigned for a new privilege. What disposition should be assigned?

- A. treat privilege approval as completion under the approved workflow
- B. let the practitioner close it with documented follow-up
- C. store results without notification through authorized escalation and document the final disposition
- D. Track completion and route results to authorized reviewers

118. A procedure crosswalk is prepared for a workflow in which FPPE is assigned for a new privilege. Which requirement should the crosswalk identify?

- A. Require staff to track completion and route results to authorized reviewers
- B. Allow staff to treat privilege approval as completion with documented follow-up
- C. Allow staff to let the practitioner close it through authorized escalation

D. Allow staff to store results without notification while preserving the audit record

119. A second-level reviewer examines a file after staff report that FPPE is assigned for a new privilege. Which confirmation is necessary before approval?

A. Confirm staff track completion and route results to authorized reviewers and documented the disposition

B. Confirm staff treat privilege approval as completion with documented follow-up and document the final disposition

C. Confirm staff let the practitioner close it through authorized escalation and document the final disposition

D. Confirm staff store results without notification while preserving the audit record and document the final disposition

120. An annual control attestation covers files in which FPPE is assigned for a new privilege. Which evidence best supports signing the attestation?

A. Sample results show staff treat privilege approval as completion under the approved workflow

B. Sample results show staff track completion and route results to authorized reviewers and retained supporting evidence

C. Sample results show staff let the practitioner close it through authorized escalation and document the final disposition

D. Sample results show staff store results without notification while preserving the audit record

121. During a weekly credentialing queue review, the team encounters a record where a required certification expires midterm. What disposition should be assigned?

A. ignore it after initial verification under the approved workflow

B. substitute an unrelated license with documented follow-up and document the final disposition

C. backdate a renewal through authorized escalation and document the final disposition

D. Apply the action specified by policy and privilege criteria

122. A procedure crosswalk is prepared for a workflow in which a required certification expires midterm. Which requirement should the crosswalk identify?

- A. Allow staff to ignore it after initial verification under the approved workflow
- B. Allow staff to substitute an unrelated license with documented follow-up
- C. Require staff to apply the action specified by policy and privilege criteria
- D. Allow staff to backdate a renewal while preserving the audit record

123. A second-level reviewer examines a file after staff report that a required certification expires midterm. Which confirmation is necessary before approval?

- A. Confirm staff ignore it after initial verification under the approved workflow and document the final disposition
- B. Confirm staff substitute an unrelated license with documented follow-up and document the final disposition
- C. Confirm staff apply the action specified by policy and privilege criteria and documented the disposition
- D. Confirm staff backdate a renewal while preserving the audit record and document the final disposition

124. An annual control attestation covers files in which a required certification expires midterm. Which evidence best supports signing the attestation?

- A. Sample results show staff ignore it after initial verification under the approved workflow
- B. Sample results show staff substitute an unrelated license with documented follow-up and document the final disposition
- C. Sample results show staff backdate a renewal through authorized escalation and document the final disposition
- D. Sample results show staff apply the action specified by policy and privilege criteria and retained supporting evidence

125. During a weekly credentialing queue review, the team encounters a record where a federal-program exclusion alert appears. What disposition should be assigned?

- A. wait for recredentialing under the approved workflow and document the final disposition
- B. Verify the finding and escalate it immediately under compliance policy
- C. treat a resume as contrary proof through authorized escalation
- D. remove the alert from the audit trail while preserving the audit record

126. A procedure crosswalk is prepared for a workflow in which a federal-program exclusion alert appears. Which requirement should the crosswalk identify?

- A. Require staff to verify the finding and escalate it immediately under compliance policy
- B. Allow staff to wait for recredentialing with documented follow-up and document the final disposition
- C. Allow staff to treat a resume as contrary proof through authorized escalation
- D. Allow staff to remove the alert from the audit trail while preserving the audit record

127. A second-level reviewer examines a file after staff report that a federal-program exclusion alert appears. Which confirmation is necessary before approval?

- A. Confirm staff wait for recredentialing under the approved workflow and document the final disposition
- B. Confirm staff treat a resume as contrary proof with documented follow-up and document the final disposition
- C. Confirm staff verify the finding and escalate it immediately under compliance policy and documented the disposition
- D. Confirm staff remove the alert from the audit trail while preserving the audit record

128. An annual control attestation covers files in which a federal-program exclusion alert appears. Which evidence best supports signing the attestation?

- A. Sample results show staff wait for recredentialing under the approved workflow and document the final disposition
- B. Sample results show staff verify the finding and escalate it immediately under compliance policy and retained supporting evidence

- C. Sample results show staff treat a resume as contrary proof through authorized escalation
- D. Sample results show staff remove the alert from the audit trail while preserving the audit record

129. During a weekly credentialing queue review, the team encounters a record where a monitoring vendor misses a scheduled query. What disposition should be assigned?

- A. assume no news means no sanction under the approved workflow
- B. change the date without querying with documented follow-up
- C. stop documenting checks through authorized escalation and document the final disposition
- D. Complete the query and correct vendor oversight controls

130. A procedure crosswalk is prepared for a workflow in which a monitoring vendor misses a scheduled query. Which requirement should the crosswalk identify?

- A. Require staff to complete the query and correct vendor oversight controls
- B. Allow staff to assume no news means no sanction
- C. Allow staff to change the date without querying through authorized escalation
- D. Allow staff to stop documenting checks while preserving the audit record

131. A second-level reviewer examines a file after staff report that a monitoring vendor misses a scheduled query. Which confirmation is necessary before approval?

- A. Confirm staff complete the query and correct vendor oversight controls and documented the disposition
- B. Confirm staff assume no news means no sanction with documented follow-up and document the final disposition
- C. Confirm staff change the date without querying through authorized escalation and document the final disposition
- D. Confirm staff stop documenting checks while preserving the audit record and document the final disposition

132. An annual control attestation covers files in which a monitoring vendor misses a scheduled query. Which evidence best supports signing the attestation?

- A. Sample results show staff assume no news means no sanction under the approved workflow
- B. Sample results show staff complete the query and correct vendor oversight controls and retained supporting evidence
- C. Sample results show staff change the date without querying through authorized escalation and document the final disposition
- D. Sample results show staff stop documenting checks while preserving the audit record and document the final disposition

133. During a weekly credentialing queue review, the team encounters a record where an audit finds missing verification dates. What disposition should be assigned?

- A. add estimated dates under the approved workflow and document the final disposition
- B. delete the audit finding with documented follow-up and document the final disposition
- C. audit only complete-looking files through authorized escalation and document the final disposition
- D. Correct affected records and investigate the underlying process weakness

134. A procedure crosswalk is prepared for a workflow in which an audit finds missing verification dates. Which requirement should the crosswalk identify?

- A. Allow staff to add estimated dates under the approved workflow
- B. Allow staff to delete the audit finding with documented follow-up
- C. Require staff to correct affected records and investigate the underlying process weakness
- D. Allow staff to audit only complete-looking files while preserving the audit record

135. During a weekly credentialing queue review, the team encounters a record where a committee meeting lacks quorum. What disposition should be assigned?

- A. count absent members as yes votes under the approved workflow
- B. let staff approve appointments with documented follow-up and document the final disposition

- C. change minutes to show quorum through authorized escalation
- D. Defer actions requiring quorum under governing documents while preserving the audit record

136. A procedure crosswalk is prepared for a workflow in which a committee meeting lacks quorum. Which requirement should the crosswalk identify?

- A. Allow staff to count absent members as yes votes
- B. Require staff to defer actions requiring quorum under governing documents
- C. Allow staff to let staff approve appointments through authorized escalation
- D. Allow staff to change minutes to show quorum

137. During a weekly credentialing queue review, the team encounters a record where minutes contain detailed peer-review discussion. What disposition should be assigned?

- A. post the minutes publicly under the approved workflow
- B. email them to applicants with documented follow-up and document the final disposition
- C. Revise documentation appropriately and restrict access through authorized escalation
- D. destroy every meeting record while preserving the audit record

138. A procedure crosswalk is prepared for a workflow in which minutes contain detailed peer-review discussion. Which requirement should the crosswalk identify?

- A. Require staff to revise documentation appropriately and restrict access
- B. Allow staff to post the minutes publicly with documented follow-up
- C. Allow staff to email them to applicants through authorized escalation
- D. Allow staff to destroy every meeting record while preserving the audit record

139. During a weekly credentialing queue review, the team encounters a record where a delegated entity is due for oversight. What disposition should be assigned?

- A. renew without evidence review under the approved workflow

- B. Evaluate performance against the agreement and applicable standards
- C. assume accreditation removes oversight through authorized escalation and document the final disposition
- D. let the delegate hide its criteria while preserving the audit record

140. A procedure crosswalk is prepared for a workflow in which a delegated entity is due for oversight. Which requirement should the crosswalk identify?

- A. Allow staff to renew without evidence review under the approved workflow
- B. Allow staff to assume accreditation removes oversight with documented follow-up
- C. Require staff to evaluate performance against the agreement and applicable standards
- D. Allow staff to let the delegate hide its criteria

141. During a weekly credentialing queue review, the team encounters a record where a policy conflicts with approved bylaws. What disposition should be assigned?

- A. use whichever document is easier under the approved workflow
- B. secretly edit the bylaws with documented follow-up and document the final disposition
- C. ignore both documents through authorized escalation and document the final disposition
- D. Escalate the conflict through the controlling governance process

142. A procedure crosswalk is prepared for a workflow in which a policy conflicts with approved bylaws. Which requirement should the crosswalk identify?

- A. Require staff to escalate the conflict through the controlling governance process
- B. Allow staff to use whichever document is easier with documented follow-up
- C. Allow staff to secretly edit the bylaws through authorized escalation
- D. Allow staff to ignore both documents while preserving the audit record

143. During a weekly credentialing queue review, the team encounters a record where committee packets are distributed electronically. What disposition should be assigned?

- A. send files to personal accounts under the approved workflow
- B. Use secure access, version control, and appropriate retention
- C. allow unrestricted forwarding through authorized escalation and document the final disposition
- D. delete the official packet early while preserving the audit record

144. A procedure crosswalk is prepared for a workflow in which committee packets are distributed electronically. Which requirement should the crosswalk identify?

- A. Allow staff to send files to personal accounts under the approved workflow
- B. Allow staff to allow unrestricted forwarding with documented follow-up
- C. Require staff to use secure access, version control, and appropriate retention
- D. Allow staff to delete the official packet early while preserving the audit record

145. During a weekly credentialing queue review, the team encounters a record where an external audit requests compliance evidence. What disposition should be assigned?

- A. Provide authorized organized records with a clear audit trail
- B. create missing evidence without notation with documented follow-up
- C. release unrelated peer-review material through authorized escalation and document the final disposition
- D. refuse every authorized request while preserving the audit record

146. A procedure crosswalk is prepared for a workflow in which an external audit requests compliance evidence. Which requirement should the crosswalk identify?

- A. Allow staff to create missing evidence without notation under the approved workflow
- B. Allow staff to release unrelated peer-review material with documented follow-up
- C. Allow staff to refuse every authorized request through authorized escalation
- D. Require staff to provide authorized organized records with a clear audit trail

147. During a weekly credentialing queue review, the team encounters a record where a committee member votes remotely. What disposition should be assigned?

- A. treat any text message as a vote under the approved workflow
- B. exclude the vote without checking policy with documented follow-up
- C. Confirm remote participation and voting meet governing requirements
- D. let nonmembers vote while preserving the audit record

148. A procedure crosswalk is prepared for a workflow in which a committee member votes remotely. Which requirement should the crosswalk identify?

- A. Allow staff to treat any text message as a vote
- B. Require staff to confirm remote participation and voting meet governing requirements
- C. Allow staff to exclude the vote without checking policy
- D. Allow staff to let nonmembers vote while preserving the audit record

149. During a weekly credentialing queue review, the team encounters a record where a database conversion changes expiration fields. What disposition should be assigned?

- A. assume migration preserved every value under the approved workflow
- B. turn off monitoring for a year with documented follow-up
- C. delete source records immediately through authorized escalation and document the final disposition
- D. Reconcile migrated data and test alerts before operational use

150. A procedure crosswalk is prepared for a workflow in which a database conversion changes expiration fields. Which requirement should the crosswalk identify?

- A. Require staff to reconcile migrated data and test alerts before operational use
- B. Allow staff to assume migration preserved every value with documented follow-up
- C. Allow staff to turn off monitoring for a year through authorized escalation
- D. Allow staff to delete source records immediately while preserving the audit record

Practice Exam 11: Answer Key and Explanations

- 1. A** — The queue-review decision should be to obtain a written explanation before treating the file as complete because material gaps must be resolved before decision makers rely on the chronology. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 2. D** — The crosswalk should identify a requirement to obtain a written explanation before treating the file as complete because material gaps must be resolved before decision makers rely on the chronology. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 3. D** — The second-level reviewer should confirm that staff obtain a written explanation before treating the file as complete because material gaps must be resolved before decision makers rely on the chronology. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 4. A** — The annual attestation is supportable when records show staff obtain a written explanation before treating the file as complete, since material gaps must be resolved before decision makers rely on the chronology. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 5. C** — The queue-review decision should be to verify current status directly with the issuing board because the licensing board is the primary source for current license status. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 6. B** — The crosswalk should identify a requirement to verify current status directly with the issuing board because the licensing board is the primary source for current license status. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 7. B** — The second-level reviewer should confirm that staff verify current status directly with the issuing board because the licensing board is the primary source for current license status. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
- 8. A** — The annual attestation is supportable when records show staff verify current status directly with the issuing board, since the licensing board is the primary source for current license status. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

9. C — The queue-review decision should be to verify education with the school or an accepted equivalent source because practitioner-supplied documents do not independently establish education. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

10. D — The crosswalk should identify a requirement to verify education with the school or an accepted equivalent source because practitioner-supplied documents do not independently establish education. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

11. D — The second-level reviewer should confirm that staff verify education with the school or an accepted equivalent source because practitioner-supplied documents do not independently establish education. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

12. A — The annual attestation is supportable when records show staff verify education with the school or an accepted equivalent source, since practitioner-supplied documents do not independently establish education. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

13. B — The queue-review decision should be to obtain evidence of training and current competence for the requested scope because privilege decisions require evidence specific to the clinical activity. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

14. C — The crosswalk should identify a requirement to obtain evidence of training and current competence for the requested scope because privilege decisions require evidence specific to the clinical activity. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

15. B — The second-level reviewer should confirm that staff obtain evidence of training and current competence for the requested scope because privilege decisions require evidence specific to the clinical activity. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

16. C — The annual attestation is supportable when records show staff obtain evidence of training and current competence for the requested scope, since privilege decisions require evidence specific to the clinical activity. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

17. D — The queue-review decision should be to resolve current licensure and apply policy before favorable action because required credentials must be current when the organization acts. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

18. A — The crosswalk should identify a requirement to resolve current licensure and apply policy before favorable action because required credentials must be current when the organization acts. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

19. A — The second-level reviewer should confirm that staff resolve current licensure and apply policy before favorable action because required credentials must be current when the organization acts. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

20. C — The annual attestation is supportable when records show staff resolve current licensure and apply policy before favorable action, since required credentials must be current when the organization acts. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

21. B — The queue-review decision should be to reconcile the discrepancy with authoritative information and practitioner clarification because material discrepancies require documented resolution. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

22. D — The crosswalk should identify a requirement to reconcile the discrepancy with authoritative information and practitioner clarification because material discrepancies require documented resolution. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

23. A — The second-level reviewer should confirm that staff reconcile the discrepancy with authoritative information and practitioner clarification because material discrepancies require documented resolution. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

24. C — The annual attestation is supportable when records show staff reconcile the discrepancy with authoritative information and practitioner clarification, since material discrepancies require documented resolution. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns

unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

25. D — The queue-review decision should be to obtain the required signed and dated attestation because attestation documents representations and authorization for verification. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

26. B — The crosswalk should identify a requirement to obtain the required signed and dated attestation because attestation documents representations and authorization for verification. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

27. A — The second-level reviewer should confirm that staff obtain the required signed and dated attestation because attestation documents representations and authorization for verification. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

28. D — The annual attestation is supportable when records show staff obtain the required signed and dated attestation, since attestation documents representations and authorization for verification. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

29. B — The queue-review decision should be to query the board or its officially designated verification source because board status should come from the board or designated equivalent. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

30. C — The crosswalk should identify a requirement to query the board or its officially designated verification source because board status should come from the board or designated equivalent. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

31. A — The second-level reviewer should confirm that staff query the board or its officially designated verification source because board status should come from the board or designated equivalent. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

32. B — The annual attestation is supportable when records show staff query the board or its officially designated verification source, since board status should come from the board or designated equivalent. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved.

Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

33. C — The queue-review decision should be to verify affiliation and relevant history with an accepted source because prior affiliations may reveal appointment, privilege, or conduct information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

34. D — The crosswalk should identify a requirement to verify affiliation and relevant history with an accepted source because prior affiliations may reveal appointment, privilege, or conduct information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

35. C — The second-level reviewer should confirm that staff verify affiliation and relevant history with an accepted source because prior affiliations may reveal appointment, privilege, or conduct information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

36. D — The annual attestation is supportable when records show staff verify affiliation and relevant history with an accepted source, since prior affiliations may reveal appointment, privilege, or conduct information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

37. A — The queue-review decision should be to defer the file until required elements are complete because authorized reviewers need a complete verified record. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

38. B — The crosswalk should identify a requirement to defer the file until required elements are complete because authorized reviewers need a complete verified record. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

39. A — The second-level reviewer should confirm that staff defer the file until required elements are complete because authorized reviewers need a complete verified record. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

40. B — The annual attestation is supportable when records show staff defer the file until required elements are complete, since authorized reviewers need a complete verified record. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

41. C — The queue-review decision should be to obtain authoritative details and evaluate them under policy because affirmative disclosures require investigation rather than automatic conclusions. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

42. D — The crosswalk should identify a requirement to obtain authoritative details and evaluate them under policy because affirmative disclosures require investigation rather than automatic conclusions. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

43. C — The second-level reviewer should confirm that staff obtain authoritative details and evaluate them under policy because affirmative disclosures require investigation rather than automatic conclusions. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

44. A — The annual attestation is supportable when records show staff obtain authoritative details and evaluate them under policy, since affirmative disclosures require investigation rather than automatic conclusions. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

45. D — The queue-review decision should be to apply the organization's limited temporary-privilege criteria because temporary privileges are exceptional and remain controlled. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

46. B — The crosswalk should identify a requirement to apply the organization's limited temporary-privilege criteria because temporary privileges are exceptional and remain controlled. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

47. B — The second-level reviewer should confirm that staff apply the organization's limited temporary-privilege criteria because temporary privileges are exceptional and remain controlled. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

48. C — The annual attestation is supportable when records show staff apply the organization's limited temporary-privilege criteria, since temporary privileges are exceptional and remain controlled. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material

issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

49. A — The queue-review decision should be to use alternative competency evidence permitted by approved criteria because low volume changes available evidence but not the duty to assess competence. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

50. D — The crosswalk should identify a requirement to use alternative competency evidence permitted by approved criteria because low volume changes available evidence but not the duty to assess competence. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

51. A — The second-level reviewer should confirm that staff use alternative competency evidence permitted by approved criteria because low volume changes available evidence but not the duty to assess competence. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

52. D — The annual attestation is supportable when records show staff use alternative competency evidence permitted by approved criteria, since low volume changes available evidence but not the duty to assess competence. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

53. C — The queue-review decision should be to retain a dated amendment and evaluate the new information because dated amendments preserve integrity and current information. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

54. B — The crosswalk should identify a requirement to retain a dated amendment and evaluate the new information because dated amendments preserve integrity and current information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

55. D — The second-level reviewer should confirm that staff retain a dated amendment and evaluate the new information because dated amendments preserve integrity and current information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

56. C — The annual attestation is supportable when records show staff retain a dated amendment and evaluate the new information, since dated amendments preserve integrity and current information.

Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

57. B — The queue-review decision should be to confirm the CVO's methods satisfy organizational acceptance criteria because delegated verification remains subject to oversight. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

58. A — The crosswalk should identify a requirement to confirm the CVO's methods satisfy organizational acceptance criteria because delegated verification remains subject to oversight. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

59. B — The second-level reviewer should confirm that staff confirm the CVO's methods satisfy organizational acceptance criteria because delegated verification remains subject to oversight. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

60. C — The annual attestation is supportable when records show staff confirm the CVO's methods satisfy organizational acceptance criteria, since delegated verification remains subject to oversight. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

61. D — The queue-review decision should be to seek relevant information about competence and professional performance because a useful professional reference must address qualifications. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

62. A — The crosswalk should identify a requirement to seek relevant information about competence and professional performance because a useful professional reference must address qualifications. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

63. A — The second-level reviewer should confirm that staff seek relevant information about competence and professional performance because a useful professional reference must address qualifications. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable

decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

64. C — The annual attestation is supportable when records show staff seek relevant information about competence and professional performance, since a useful professional reference must address qualifications. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

65. D — The queue-review decision should be to resolve identity with documented name history and reliable identifiers because identity matching prevents missed history and false attribution. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

66. B — The crosswalk should identify a requirement to resolve identity with documented name history and reliable identifiers because identity matching prevents missed history and false attribution. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

67. A — The second-level reviewer should confirm that staff resolve identity with documented name history and reliable identifiers because identity matching prevents missed history and false attribution. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

68. B — The annual attestation is supportable when records show staff resolve identity with documented name history and reliable identifiers, since identity matching prevents missed history and false attribution. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

69. D — The queue-review decision should be to follow policy for an application that cannot be verified because required review cannot be completed when necessary information is unavailable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

70. C — The crosswalk should identify a requirement to follow policy for an application that cannot be verified because required review cannot be completed when necessary information is unavailable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

71. C — The second-level reviewer should confirm that staff follow policy for an application that cannot be verified because required review cannot be completed when necessary information is unavailable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns

unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

72. B — The annual attestation is supportable when records show staff follow policy for an application that cannot be verified, since required review cannot be completed when necessary information is unavailable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

73. A — The queue-review decision should be to evaluate it with the practitioner's explanation and relevant evidence because an adverse report is significant but requires contextual due process. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

74. D — The crosswalk should identify a requirement to evaluate it with the practitioner's explanation and relevant evidence because an adverse report is significant but requires contextual due process. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

75. C — The second-level reviewer should confirm that staff evaluate it with the practitioner's explanation and relevant evidence because an adverse report is significant but requires contextual due process. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

76. D — The annual attestation is supportable when records show staff evaluate it with the practitioner's explanation and relevant evidence, since an adverse report is significant but requires contextual due process. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

77. B — The queue-review decision should be to process the request under approved criteria and competency requirements because new privileges require focused review despite current appointment. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

78. A — The crosswalk should identify a requirement to process the request under approved criteria and competency requirements because new privileges require focused review despite current appointment. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

79. A — The second-level reviewer should confirm that staff process the request under approved criteria and competency requirements because new privileges require focused review despite current appointment. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns

unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

80. B — The annual attestation is supportable when records show staff process the request under approved criteria and competency requirements, since new privileges require focused review despite current appointment. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

81. C — The queue-review decision should be to use an accepted equivalent source if permitted and document all efforts because alternatives are acceptable only when authorized and documented. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

82. D — The crosswalk should identify a requirement to use an accepted equivalent source if permitted and document all efforts because alternatives are acceptable only when authorized and documented. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

83. C — The second-level reviewer should confirm that staff use an accepted equivalent source if permitted and document all efforts because alternatives are acceptable only when authorized and documented. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

84. D — The annual attestation is supportable when records show staff use an accepted equivalent source if permitted and document all efforts, since alternatives are acceptable only when authorized and documented. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

85. B — The queue-review decision should be to route the exception through the adopted approval process because consistent criteria and formal exceptions protect fairness. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

86. A — The crosswalk should identify a requirement to route the exception through the adopted approval process because consistent criteria and formal exceptions protect fairness. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

87. C — The second-level reviewer should confirm that staff route the exception through the adopted approval process because consistent criteria and formal exceptions protect fairness. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue

unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

88. D — The annual attestation is supportable when records show staff route the exception through the adopted approval process, since consistent criteria and formal exceptions protect fairness. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

89. B — The queue-review decision should be to apply the conflict policy and document appropriate recusal because managed recusal preserves impartial review. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

90. B — The crosswalk should identify a requirement to apply the conflict policy and document appropriate recusal because managed recusal preserves impartial review. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

91. A — The second-level reviewer should confirm that staff apply the conflict policy and document appropriate recusal because managed recusal preserves impartial review. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

92. D — The annual attestation is supportable when records show staff apply the conflict policy and document appropriate recusal, since managed recusal preserves impartial review. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

93. C — The queue-review decision should be to start the defined monitoring review and notify authorized leaders because new sanctions require timely evaluation between cycles. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

94. A — The crosswalk should identify a requirement to start the defined monitoring review and notify authorized leaders because new sanctions require timely evaluation between cycles. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

95. D — The second-level reviewer should confirm that staff start the defined monitoring review and notify authorized leaders because new sanctions require timely evaluation between cycles. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

96. A — The annual attestation is supportable when records show staff start the defined monitoring review and notify authorized leaders, since new sanctions require timely evaluation between cycles. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

97. C — The queue-review decision should be to notify responsible parties and track verified renewal because advance tracking helps prevent practice on an expired credential. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

98. B — The crosswalk should identify a requirement to notify responsible parties and track verified renewal because advance tracking helps prevent practice on an expired credential. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

99. B — The second-level reviewer should confirm that staff notify responsible parties and track verified renewal because advance tracking helps prevent practice on an expired credential. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

100. A — The annual attestation is supportable when records show staff notify responsible parties and track verified renewal, since advance tracking helps prevent practice on an expired credential. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

101. D — The queue-review decision should be to aggregate and route the pattern through the approved review process because patterns may reveal risk that isolated review misses. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

102. C — The crosswalk should identify a requirement to aggregate and route the pattern through the approved review process because patterns may reveal risk that isolated review misses. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

103. D — The second-level reviewer should confirm that staff aggregate and route the pattern through the approved review process because patterns may reveal risk that isolated review misses. Alternatives

depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

104. A — The annual attestation is supportable when records show staff aggregate and route the pattern through the approved review process, since patterns may reveal risk that isolated review misses. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

105. C — The queue-review decision should be to escalate the trend for authorized clinical review because performance trends belong with clinical decision makers. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

106. B — The crosswalk should identify a requirement to escalate the trend for authorized clinical review because performance trends belong with clinical decision makers. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

107. C — The second-level reviewer should confirm that staff escalate the trend for authorized clinical review because performance trends belong with clinical decision makers. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

108. B — The annual attestation is supportable when records show staff escalate the trend for authorized clinical review, since performance trends belong with clinical decision makers. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

109. A — The queue-review decision should be to verify updated coverage and revise expiration tracking because coverage changes may affect continuing compliance. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

110. D — The crosswalk should identify a requirement to verify updated coverage and revise expiration tracking because coverage changes may affect continuing compliance. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

111. A — The second-level reviewer should confirm that staff verify updated coverage and revise expiration tracking because coverage changes may affect continuing compliance. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue

unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

112. C — The annual attestation is supportable when records show staff verify updated coverage and revise expiration tracking, since coverage changes may affect continuing compliance. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

113. D — The queue-review decision should be to resolve identity before attributing the result because accurate matching prevents false attribution and missed findings. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

114. B — The crosswalk should identify a requirement to resolve identity before attributing the result because accurate matching prevents false attribution and missed findings. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

115. C — The second-level reviewer should confirm that staff resolve identity before attributing the result because accurate matching prevents false attribution and missed findings. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

116. B — The annual attestation is supportable when records show staff resolve identity before attributing the result, since accurate matching prevents false attribution and missed findings. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

117. D — The queue-review decision should be to track completion and route results to authorized reviewers because focused evaluation must produce reviewable competency evidence. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

118. A — The crosswalk should identify a requirement to track completion and route results to authorized reviewers because focused evaluation must produce reviewable competency evidence. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

119. A — The second-level reviewer should confirm that staff track completion and route results to authorized reviewers because focused evaluation must produce reviewable competency evidence. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

120. B — The annual attestation is supportable when records show staff track completion and route results to authorized reviewers, since focused evaluation must produce reviewable competency evidence. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

121. D — The queue-review decision should be to apply the action specified by policy and privilege criteria because continued eligibility depends on maintaining required credentials. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

122. C — The crosswalk should identify a requirement to apply the action specified by policy and privilege criteria because continued eligibility depends on maintaining required credentials. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

123. C — The second-level reviewer should confirm that staff apply the action specified by policy and privilege criteria because continued eligibility depends on maintaining required credentials. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

124. D — The annual attestation is supportable when records show staff apply the action specified by policy and privilege criteria, since continued eligibility depends on maintaining required credentials. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

125. B — The queue-review decision should be to verify the finding and escalate it immediately under compliance policy because exclusion information can create immediate legal and operational risk. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

126. A — The crosswalk should identify a requirement to verify the finding and escalate it immediately under compliance policy because exclusion information can create immediate legal and operational risk. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved.

Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

127. C — The second-level reviewer should confirm that staff verify the finding and escalate it immediately under compliance policy because exclusion information can create immediate legal and operational risk. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

128. B — The annual attestation is supportable when records show staff verify the finding and escalate it immediately under compliance policy, since exclusion information can create immediate legal and operational risk. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

129. D — The queue-review decision should be to complete the query and correct vendor oversight controls because delegation does not remove organizational monitoring responsibility. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

130. A — The crosswalk should identify a requirement to complete the query and correct vendor oversight controls because delegation does not remove organizational monitoring responsibility. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

131. A — The second-level reviewer should confirm that staff complete the query and correct vendor oversight controls because delegation does not remove organizational monitoring responsibility. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

132. B — The annual attestation is supportable when records show staff complete the query and correct vendor oversight controls, since delegation does not remove organizational monitoring responsibility. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

133. D — The queue-review decision should be to correct affected records and investigate the underlying process weakness because corrective action must address records and system controls. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

134. C — The crosswalk should identify a requirement to correct affected records and investigate the underlying process weakness because corrective action must address records and system controls. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

135. D — The queue-review decision should be to defer actions requiring quorum under governing documents because valid committee action depends on adopted meeting requirements. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

136. B — The crosswalk should identify a requirement to defer actions requiring quorum under governing documents because valid committee action depends on adopted meeting requirements. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

137. C — The queue-review decision should be to revise documentation appropriately and restrict access because minutes should document action while protecting sensitive deliberations. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

138. A — The crosswalk should identify a requirement to revise documentation appropriately and restrict access because minutes should document action while protecting sensitive deliberations. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

139. B — The queue-review decision should be to evaluate performance against the agreement and applicable standards because delegation requires continuing oversight. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

140. C — The crosswalk should identify a requirement to evaluate performance against the agreement and applicable standards because delegation requires continuing oversight. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

141. D — The queue-review decision should be to escalate the conflict through the controlling governance process because governing documents need alignment through authorized procedures. The

alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

142. A — The crosswalk should identify a requirement to escalate the conflict through the controlling governance process because governing documents need alignment through authorized procedures. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

143. B — The queue-review decision should be to use secure access, version control, and appropriate retention because controlled distribution protects confidentiality and record integrity. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

144. C — The crosswalk should identify a requirement to use secure access, version control, and appropriate retention because controlled distribution protects confidentiality and record integrity. The alternatives depend on assumptions, omit verification, bypass authorized review, or leave a material issue unresolved. Correct handling promotes consistency, accountability, reliable decision support, ongoing monitoring, confidentiality, and a defensible record for reappointment, auditing, and organizational oversight.

145. A — The queue-review decision should be to provide authorized organized records with a clear audit trail because audit responses should be accurate, scoped, and traceable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

146. D — The crosswalk should identify a requirement to provide authorized organized records with a clear audit trail because audit responses should be accurate, scoped, and traceable. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

147. C — The queue-review decision should be to confirm remote participation and voting meet governing requirements because meeting methods must preserve authorized participation and valid action. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record. It also assigns responsibility for timely follow-up.

148. B — The crosswalk should identify a requirement to confirm remote participation and voting meet governing requirements because meeting methods must preserve authorized participation and valid action. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

149. D — The queue-review decision should be to reconcile migrated data and test alerts before operational use because data validation is essential before controls depend on converted information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.

150. A — The crosswalk should identify a requirement to reconcile migrated data and test alerts before operational use because data validation is essential before controls depend on converted information. Alternatives depend on assumptions, skip verification, bypass authority, or leave concerns unresolved. Correct handling promotes consistency, accountability, reliable decisions, monitoring, and a defensible audit record.
