

TSI QUICK STUDY GUIDE 2026-2027: PRACTICE EXAM

7 (146 QUESTIONS)

This 146-question practice exam is an original study tool, not an official TSIA2 form. Complete the questions without assistance, then use the answer key and explanations to identify skills to review. Questions 1-73 emphasize mathematics; questions 74-146 emphasize English language arts and reading. TSIA2 is computer-adaptive, so actual testing routes and item counts vary by performance.

1. What is $348 - 320$?

- A. 24
- B. 28
- C. 33
- D. 668

2. What is 35×30 ?

- A. 1050
- B. 1015
- C. 1080
- D. 65

3. What is $1295 \div 35$?

- A. 35
- B. 37
- C. 38
- D. 36

4. What is 90% of 950?

- A. 850
- B. 865
- C. 860
- D. 855

5. Solve for x : $x + 40 = 83$.

- A. 43
- B. 40
- C. 47
- D. 83

6. A rectangle is 43 units long and 39 units wide. What is its perimeter?

- A. 1677
- B. 82
- C. 164
- D. 168

7. What is the mean of 314, 317, and 320?

- A. 951
- B. 317
- C. 319
- D. 318

8. 21 notebooks cost \$714. What is the cost per notebook?

- A. 33
- B. 36
- C. 693
- D. 34

9. For $f(x) = 3x + 5$, what is $f(33)$?

- A. 104
- B. 101
- C. 109
- D. 36

10. What is $325 + 332$?

- A. 657
- B. 654
- C. 661
- D. 664

11. What is $358 - 330$?

- A. 24
- B. 33
- C. 28
- D. 688

12. What is 38×28 ?

- A. 1026
- B. 1064
- C. 1092

D. 66

13. What is $1406 \div 37$?

A. 36

B. 39

C. 37

D. 38

14. What is 90% of 1000?

A. 895

B. 910

C. 900

D. 911

15. Solve for x : $x + 38 = 76$.

A. 35

B. 38

C. 42

D. 76

16. A rectangle is 43 units long and 35 units wide. What is its perimeter?

A. 1505

B. 78

C. 156

D. 160

17. What is the mean of 324, 327, and 330?

- A. 327
- B. 981
- C. 329
- D. 328

18. 21 notebooks cost \$777. What is the cost per notebook?

- A. 36
- B. 39
- C. 756
- D. 37

19. For $f(x) = 3x + 5$, what is $f(35)$?

- A. 107
- B. 115
- C. 38
- D. 110

20. What is $335 + 342$?

- A. 674
- B. 677
- C. 681
- D. 684

21. What is $368 - 340$?

- A. 24
- B. 33
- C. 28
- D. 708

22. What is 34×32 ?

- A. 1088
- B. 1054
- C. 1120
- D. 66

23. What is $1521 \div 39$?

- A. 37
- B. 40
- C. 41
- D. 39

24. What is 90% of 850?

- A. 760
- B. 775
- C. 765
- D. 761

25. Solve for x: $x + 36 = 84$.

- A. 48
- B. 45
- C. 52

D. 84

26. A rectangle is 43 units long and 38 units wide. What is its perimeter?

A. 1634

B. 162

C. 81

D. 166

27. What is the mean of 334, 337, and 340?

A. 1011

B. 339

C. 337

D. 338

28. 21 notebooks cost \$693. What is the cost per notebook?

A. 33

B. 32

C. 35

D. 672

29. For $f(x) = 3x + 5$, what is $f(37)$?

A. 113

B. 121

C. 40

D. 116

30. What is $345 + 352$?

A. 694

B. 697

C. 701

D. 704

31. What is $378 - 350$?

A. 24

B. 33

C. 728

D. 28

32. What is 37×30 ?

A. 1073

B. 1110

C. 1140

D. 67

33. What is $1320 \div 33$?

A. 38

B. 41

C. 40

D. 33

34. What is 90% of 900?

- A. 810
- B. 805
- C. 820
- D. 811

35. Solve for x : $x + 46 = 89$.

- A. 40
- B. 47
- C. 43
- D. 89

36. A rectangle is 43 units long and 34 units wide. What is its perimeter?

- A. 1462
- B. 77
- C. 158
- D. 154

37. What is the mean of 344, 347, and 350?

- A. 347
- B. 1041
- C. 349
- D. 348

38. 21 notebooks cost \$756. What is the cost per notebook?

- A. 35
- B. 36
- C. 38

D. 735

39. For $f(x) = 3x + 5$, what is $f(39)$?

A. 119

B. 127

C. 42

D. 122

40. What is $355 + 362$?

A. 714

B. 721

C. 717

D. 724

41. What is $388 - 360$?

A. 24

B. 28

C. 33

D. 748

42. What is 33×28 ?

A. 924

B. 891

C. 952

D. 61

43. What is $1435 \div 35$?

- A. 41
- B. 39
- C. 42
- D. 35

44. What is 90% of 950?

- A. 850
- B. 865
- C. 860
- D. 855

45. Solve for x : $x + 44 = 82$.

- A. 35
- B. 42
- C. 38
- D. 82

46. A rectangle is 43 units long and 37 units wide. What is its perimeter?

- A. 1591
- B. 160
- C. 80
- D. 164

47. What is the mean of 354, 357, and 360?

- A. 357
- B. 1071
- C. 359
- D. 358

48. 21 notebooks cost \$819. What is the cost per notebook?

- A. 38
- B. 41
- C. 798
- D. 39

49. For $f(x) = 3x + 5$, what is $f(33)$?

- A. 101
- B. 104
- C. 109
- D. 36

50. What is $365 + 372$?

- A. 734
- B. 741
- C. 737
- D. 744

51. What is $398 - 370$?

- A. 24
- B. 28
- C. 33

D. 768

52. What is 36×32 ?

A. 1116

B. 1184

C. 1152

D. 68

53. What is $1554 \div 37$?

A. 42

B. 40

C. 43

D. 37

54. What is 90% of 1000?

A. 895

B. 910

C. 911

D. 900

55. Solve for x : $x + 42 = 90$.

A. 45

B. 48

C. 52

D. 90

56. A rectangle is 43 units long and 33 units wide. What is its perimeter?

- A. 152
- B. 1419
- C. 76
- D. 156

57. What is the mean of 364, 367, and 370?

- A. 1101
- B. 369
- C. 368
- D. 367

58. 21 notebooks cost \$735. What is the cost per notebook?

- A. 34
- B. 37
- C. 35
- D. 714

59. For $f(x) = 3x + 5$, what is $f(35)$?

- A. 107
- B. 115
- C. 38
- D. 110

60. What is $375 + 382$?

- A. 757
- B. 754
- C. 761
- D. 764

61. What is $408 - 380$?

- A. 24
- B. 28
- C. 33
- D. 788

62. What is 39×30 ?

- A. 1131
- B. 1200
- C. 1170
- D. 69

63. What is $1326 \div 39$?

- A. 32
- B. 34
- C. 35
- D. 39

64. What is 90% of 850?

- A. 760
- B. 775
- C. 761

D. 765

65. Solve for x : $x + 40 = 83$.

A. 40

B. 47

C. 43

D. 83

66. A rectangle is 43 units long and 36 units wide. What is its perimeter?

A. 158

B. 1548

C. 79

D. 162

67. What is the mean of 374, 377, and 380?

A. 377

B. 1131

C. 379

D. 378

68. 21 notebooks cost \$798. What is the cost per notebook?

A. 37

B. 40

C. 777

D. 38

69. For $f(x) = 3x + 5$, what is $f(37)$?

- A. 113
- B. 121
- C. 116
- D. 40

70. What is $385 + 392$?

- A. 774
- B. 777
- C. 781
- D. 784

71. What is $418 - 390$?

- A. 28
- B. 24
- C. 33
- D. 808

72. What is 35×28 ?

- A. 945
- B. 1008
- C. 980
- D. 63

73. What is $1155 \div 33$?

- A. 33
- B. 36
- C. 34
- D. 35

74. The engineer proposed a ____ plan that addressed each safety concern.

- A. imaginary
- B. practical
- C. careless
- D. distant

75. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. and
- C. although
- D. because

76. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. The boxes on the shelf contains labels.
- C. Every box on the shelf contains a label.
- D. The box and folder contains labels.

77. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. For example

- B. Likewise
- C. Therefore
- D. However

78. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Residents used several projects to improve their shared environment.
- B. Gardens were the only neighborhood project.
- C. Recycling bins are difficult to move.
- D. Clean-up days are always unpopular.

79. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The average number of books completed rose from 3.2 to 5.7 per student.
- C. The program met in a bright room after school.
- D. Several students brought backpacks and water bottles to meetings.

80. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. I believe the proposal is useful.
- B. In my opinion, I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

81. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. All residents prefer painting to every other activity offered.
- B. The center has never held classes after sunset before.
- C. Evening art classes require no materials or planning at all.
- D. Some residents who work days would attend an art class offered in the evening.

82. The editor asked the reporter to ____ the source before publishing the story.

- A. ignore
- B. invent
- C. confirm
- D. remove

83. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. and
- D. because

84. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. The boxes on the shelf contains labels.
- C. The box and folder contains labels.
- D. Every box on the shelf contains a label.

85. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. For example

- B. However
- C. Likewise
- D. Therefore

86. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Residents used several projects to improve their shared environment.
- B. Gardens were the only neighborhood project.
- C. Recycling bins are difficult to move.
- D. Clean-up days are always unpopular.

87. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The program met in a bright room after school.
- C. Several students brought backpacks and water bottles to meetings.
- D. The average number of books completed rose from 3.2 to 5.7 per student.

88. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

89. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. Some residents who work days would attend an art class offered in the evening.
- B. All residents prefer painting to every other activity offered.
- C. The center has never held classes after sunset before.
- D. Evening art classes require no materials or planning at all.

90. The volunteer gave a ____ response, explaining each step to the visitor.

- A. private
- B. brief
- C. helpful
- D. uncertain

91. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. because
- D. and

92. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. The boxes on the shelf contains labels.
- C. Every box on the shelf contains a label.
- D. The box and folder contains labels.

93. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. However

- B. For example
- C. Likewise
- D. Therefore

94. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Residents used several projects to improve their shared environment.
- C. Recycling bins are difficult to move.
- D. Clean-up days are always unpopular.

95. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The program met in a bright room after school.
- C. The average number of books completed rose from 3.2 to 5.7 per student.
- D. Several students brought backpacks and water bottles to meetings.

96. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I personally believe the proposal is useful.
- C. The proposal is useful in my personal opinion.
- D. I believe the proposal is useful.

97. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. Some residents who work days would attend an art class offered in the evening.
- B. All residents prefer painting to every other activity offered.
- C. The center has never held classes after sunset before.
- D. Evening art classes require no materials or planning at all.

98. The scientist recorded the results ____ so another team could repeat the study.

- A. rarely
- B. carefully
- C. casually
- D. secretly

99. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. and
- D. because

100. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. Every box on the shelf contains a label.
- C. The boxes on the shelf contains labels.
- D. The box and folder contains labels.

101. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. However

- B. For example
- C. Likewise
- D. Therefore

102. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Recycling bins are difficult to move.
- C. Clean-up days are always unpopular.
- D. Residents used several projects to improve their shared environment.

103. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. The average number of books completed rose from 3.2 to 5.7 per student.
- B. Students received bookmarks and reading logs at the program.
- C. The program met in a bright room after school.
- D. Several students brought backpacks and water bottles to meetings.

104. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

105. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. All residents prefer painting to every other activity offered.
- B. The center has never held classes after sunset before.
- C. Some residents who work days would attend an art class offered in the evening.
- D. Evening art classes require no materials or planning at all.

106. The engineer proposed a ____ plan that addressed each safety concern.

- A. imaginary
- B. careless
- C. distant
- D. practical

107. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. because
- D. and

108. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contains a label.
- B. Every box on the shelf contain a label.
- C. The boxes on the shelf contains labels.
- D. The box and folder contains labels.

109. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. For example

- B. Likewise
- C. However
- D. Therefore

110. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Residents used several projects to improve their shared environment.
- C. Recycling bins are difficult to move.
- D. Clean-up days are always unpopular.

111. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The average number of books completed rose from 3.2 to 5.7 per student.
- C. The program met in a bright room after school.
- D. Several students brought backpacks and water bottles to meetings.

112. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I personally believe the proposal is useful.
- C. I believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

113. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. Some residents who work days would attend an art class offered in the evening.
- B. All residents prefer painting to every other activity offered.
- C. The center has never held classes after sunset before.
- D. Evening art classes require no materials or planning at all.

114. The editor asked the reporter to ____ the source before publishing the story.

- A. ignore
- B. invent
- C. remove
- D. confirm

115. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. and
- B. unless
- C. although
- D. because

116. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. Every box on the shelf contains a label.
- C. The boxes on the shelf contains labels.
- D. The box and folder contains labels.

117. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. For example

- B. Likewise
- C. However
- D. Therefore

118. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Recycling bins are difficult to move.
- C. Clean-up days are always unpopular.
- D. Residents used several projects to improve their shared environment.

119. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The average number of books completed rose from 3.2 to 5.7 per student.
- C. The program met in a bright room after school.
- D. Several students brought backpacks and water bottles to meetings.

120. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. I believe the proposal is useful.
- B. In my opinion, I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

121. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. All residents prefer painting to every other activity offered.
- B. The center has never held classes after sunset before.
- C. Evening art classes require no materials or planning at all.
- D. Some residents who work days would attend an art class offered in the evening.

122. The volunteer gave a ____ response, explaining each step to the visitor.

- A. private
- B. brief
- C. helpful
- D. uncertain

123. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. because
- D. and

124. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. Every box on the shelf contains a label.
- C. The boxes on the shelf contains labels.
- D. The box and folder contains labels.

125. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. However

- B. For example
- C. Likewise
- D. Therefore

126. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Recycling bins are difficult to move.
- C. Residents used several projects to improve their shared environment.
- D. Clean-up days are always unpopular.

127. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. The average number of books completed rose from 3.2 to 5.7 per student.
- B. Students received bookmarks and reading logs at the program.
- C. The program met in a bright room after school.
- D. Several students brought backpacks and water bottles to meetings.

128. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

129. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. All residents prefer painting to every other activity offered.
- B. The center has never held classes after sunset before.
- C. Evening art classes require no materials or planning at all.
- D. Some residents who work days would attend an art class offered in the evening.

130. The scientist recorded the results ____ so another team could repeat the study.

- A. rarely
- B. casually
- C. carefully
- D. secretly

131. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. unless
- B. although
- C. because
- D. and

132. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. The boxes on the shelf contains labels.
- C. Every box on the shelf contains a label.
- D. The box and folder contains labels.

133. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. However

- B. For example
- C. Likewise
- D. Therefore

134. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Residents used several projects to improve their shared environment.
- C. Recycling bins are difficult to move.
- D. Clean-up days are always unpopular.

135. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The program met in a bright room after school.
- C. The average number of books completed rose from 3.2 to 5.7 per student.
- D. Several students brought backpacks and water bottles to meetings.

136. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. I believe the proposal is useful.
- B. In my opinion, I believe the proposal is useful.
- C. I personally believe the proposal is useful.
- D. The proposal is useful in my personal opinion.

137. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. All residents prefer painting to every other activity offered.
- B. Some residents who work days would attend an art class offered in the evening.
- C. The center has never held classes after sunset before.
- D. Evening art classes require no materials or planning at all.

138. The engineer proposed a ____ plan that addressed each safety concern.

- A. imaginary
- B. careless
- C. distant
- D. practical

139. Which revision correctly completes the sentence? 'The bus arrived early, ____ the passengers boarded immediately.'

- A. and
- B. unless
- C. although
- D. because

140. Which sentence uses subject-verb agreement correctly?

- A. Every box on the shelf contain a label.
- B. The boxes on the shelf contains labels.
- C. Every box on the shelf contains a label.
- D. The box and folder contains labels.

141. Which transition best completes the sentence? 'The map was clear and the trail was marked. ____, the hikers still got lost.'

- A. For example

- B. However
- C. Likewise
- D. Therefore

142. A passage describes a neighborhood planting gardens, adding recycling bins, and organizing clean-up days. What is the main idea?

- A. Gardens were the only neighborhood project.
- B. Recycling bins are difficult to move.
- C. Clean-up days are always unpopular.
- D. Residents used several projects to improve their shared environment.

143. Which sentence provides the strongest evidence for the claim that a reading program increased the number of books students finished?

- A. Students received bookmarks and reading logs at the program.
- B. The program met in a bright room after school.
- C. The average number of books completed rose from 3.2 to 5.7 per student.
- D. Several students brought backpacks and water bottles to meetings.

144. Which revision is most concise while preserving the meaning? 'In my personal opinion, I believe the proposal is useful.'

- A. In my opinion, I believe the proposal is useful.
- B. I personally believe the proposal is useful.
- C. The proposal is useful in my personal opinion.
- D. I believe the proposal is useful.

145. A writer states, 'The community center should offer an evening art class because many residents work during the day.' Which assumption supports the argument?

- A. Some residents who work days would attend an art class offered in the evening.
- B. All residents prefer painting to every other activity offered.
- C. The center has never held classes after sunset before.
- D. Evening art classes require no materials or planning at all.

146. The editor asked the reporter to ____ the source before publishing the story.

- A. ignore
- B. confirm
- C. invent
- D. remove

Practice Exam 7: Answer Key and Explanations

1. B — The correct choice is B. Subtracting 320 from 348 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

2. A — The correct choice is A. Multiplying 35 by 30 gives 1050. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

3. B — The correct choice is B. Dividing 1295 into groups of 35 gives 37. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

4. D — The correct choice is D. Converting 90% to a fraction of 950 gives 855. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

5. A — The correct choice is A. Subtracting 40 from both sides leaves $x = 43$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

- 6. C** — The correct choice is C. A rectangle's perimeter is two lengths plus two widths, or 164. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 7. B** — The correct choice is B. Adding the three values and dividing by three gives 317. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 8. D** — The correct choice is D. Dividing the total cost \$714 by 21 notebooks gives \$34 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 9. A** — The correct choice is A. Substituting 33 into $3x + 5$ gives 104. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 10. A** — The correct choice is A. Adding 325 and 332 gives 657. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 11. C** — The correct choice is C. Subtracting 330 from 358 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 12. B** — The correct choice is B. Multiplying 38 by 28 gives 1064. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 13. D** — The correct choice is D. Dividing 1406 into groups of 37 gives 38. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.
- 14. C** — The correct choice is C. Converting 90% to a fraction of 1000 gives 900. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

15. B — The correct choice is B. Subtracting 38 from both sides leaves $x = 38$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

16. C — The correct choice is C. A rectangle's perimeter is two lengths plus two widths, or 156. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

17. A — The correct choice is A. Adding the three values and dividing by three gives 327. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

18. D — The correct choice is D. Dividing the total cost \$777 by 21 notebooks gives \$37 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

19. D — The correct choice is D. Substituting 35 into $3x + 5$ gives 110. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

20. B — The correct choice is B. Adding 335 and 342 gives 677. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

21. C — The correct choice is C. Subtracting 340 from 368 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

22. A — The correct choice is A. Multiplying 34 by 32 gives 1088. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

23. D — The correct choice is D. Dividing 1521 into groups of 39 gives 39. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

24. C — The correct choice is C. Converting 90% to a fraction of 850 gives 765. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

25. A — The correct choice is A. Subtracting 36 from both sides leaves $x = 48$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

26. B — The correct choice is B. A rectangle's perimeter is two lengths plus two widths, or 162. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

27. C — The correct choice is C. Adding the three values and dividing by three gives 337. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

28. A — The correct choice is A. Dividing the total cost \$693 by 21 notebooks gives \$33 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

29. D — The correct choice is D. Substituting 37 into $3x + 5$ gives 116. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

30. B — The correct choice is B. Adding 345 and 352 gives 697. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

31. D — The correct choice is D. Subtracting 350 from 378 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

32. B — The correct choice is B. Multiplying 37 by 30 gives 1110. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

33. C — The correct choice is C. Dividing 1320 into groups of 33 gives 40. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

34. A — The correct choice is A. Converting 90% to a fraction of 900 gives 810. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

35. C — The correct choice is C. Subtracting 46 from both sides leaves $x = 43$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

36. D — The correct choice is D. A rectangle's perimeter is two lengths plus two widths, or 154. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

37. A — The correct choice is A. Adding the three values and dividing by three gives 347. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

38. B — The correct choice is B. Dividing the total cost \$756 by 21 notebooks gives \$36 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

39. D — The correct choice is D. Substituting 39 into $3x + 5$ gives 122. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

40. C — The correct choice is C. Adding 355 and 362 gives 717. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

41. B — The correct choice is B. Subtracting 360 from 388 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

42. A — The correct choice is A. Multiplying 33 by 28 gives 924. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

43. A — The correct choice is A. Dividing 1435 into groups of 35 gives 41. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

44. D — The correct choice is D. Converting 90% to a fraction of 950 gives 855. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

45. C — The correct choice is C. Subtracting 44 from both sides leaves $x = 38$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

46. B — The correct choice is B. A rectangle's perimeter is two lengths plus two widths, or 160. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

47. A — The correct choice is A. Adding the three values and dividing by three gives 357. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

48. D — The correct choice is D. Dividing the total cost \$819 by 21 notebooks gives \$39 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

49. B — The correct choice is B. Substituting 33 into $3x + 5$ gives 104. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

50. C — The correct choice is C. Adding 365 and 372 gives 737. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

51. B — The correct choice is B. Subtracting 370 from 398 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

52. C — The correct choice is C. Multiplying 36 by 32 gives 1152. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

53. A — The correct choice is A. Dividing 1554 into groups of 37 gives 42. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

54. D — The correct choice is D. Converting 90% to a fraction of 1000 gives 900. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

55. B — The correct choice is B. Subtracting 42 from both sides leaves $x = 48$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

56. A — The correct choice is A. A rectangle's perimeter is two lengths plus two widths, or 152. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

57. D — The correct choice is D. Adding the three values and dividing by three gives 367. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

58. C — The correct choice is C. Dividing the total cost \$735 by 21 notebooks gives \$35 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

59. D — The correct choice is D. Substituting 35 into $3x + 5$ gives 110. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

60. A — The correct choice is A. Adding 375 and 382 gives 757. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

61. B — The correct choice is B. Subtracting 380 from 408 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

62. C — The correct choice is C. Multiplying 39 by 30 gives 1170. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

63. B — The correct choice is B. Dividing 1326 into groups of 39 gives 34. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

64. D — The correct choice is D. Converting 90% to a fraction of 850 gives 765. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

65. C — The correct choice is C. Subtracting 40 from both sides leaves $x = 43$. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

66. A — The correct choice is A. A rectangle's perimeter is two lengths plus two widths, or 158. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

67. A — The correct choice is A. Adding the three values and dividing by three gives 377. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

68. D — The correct choice is D. Dividing the total cost \$798 by 21 notebooks gives \$38 each. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

69. C — The correct choice is C. Substituting 37 into $3x + 5$ gives 116. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

70. B — The correct choice is B. Adding 385 and 392 gives 777. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

71. A — The correct choice is A. Subtracting 390 from 418 gives 28. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

72. C — The correct choice is C. Multiplying 35 by 28 gives 980. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

73. D — The correct choice is D. Dividing 1155 into groups of 33 gives 35. This result follows from the information in the stem and the required operation. Check the units and estimate the answer before choosing. The other options reflect common arithmetic errors, including reversing an operation, using only one value, or stopping before the calculation is complete.

74. B — The correct choice is B. 'Practical' describes a plan that can be carried out effectively in real conditions. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

75. B — The correct choice is B. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

76. C — The correct choice is C. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

77. D — The correct choice is D. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

78. A — The correct choice is A. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

79. B — The correct choice is B. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

80. A — The correct choice is A. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

81. D — The correct choice is D. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

82. C — The correct choice is C. 'Confirm' means to verify that information is accurate before using it. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

83. C — The correct choice is C. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

84. D — The correct choice is D. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

85. B — The correct choice is B. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

86. A — The correct choice is A. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

87. D — The correct choice is D. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

88. B — The correct choice is B. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

89. A — The correct choice is A. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

90. C — The correct choice is C. 'Helpful' fits a response that provides useful guidance and support. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

91. D — The correct choice is D. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

92. C — The correct choice is C. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

93. A — The correct choice is A. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

94. B — The correct choice is B. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

95. C — The correct choice is C. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

96. D — The correct choice is D. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

97. A — The correct choice is A. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

98. B — The correct choice is B. 'Carefully' describes work done with attention to accuracy and detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

99. C — The correct choice is C. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

100. B — The correct choice is B. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

101. A — The correct choice is A. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

102. D — The correct choice is D. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

103. A — The correct choice is A. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

104. B — The correct choice is B. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

105. C — The correct choice is C. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

106. D — The correct choice is D. 'Practical' describes a plan that can be carried out effectively in real conditions. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

107. D — The correct choice is D. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

108. A — The correct choice is A. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

109. C — The correct choice is C. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

110. B — The correct choice is B. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

111. B — The correct choice is B. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

112. C — The correct choice is C. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

113. A — The correct choice is A. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision,

evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

114. D — The correct choice is D. 'Confirm' means to verify that information is accurate before using it. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

115. A — The correct choice is A. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

116. B — The correct choice is B. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

117. C — The correct choice is C. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

118. D — The correct choice is D. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

119. B — The correct choice is B. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

120. A — The correct choice is A. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

121. D — The correct choice is D. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

122. C — The correct choice is C. 'Helpful' fits a response that provides useful guidance and support. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

123. D — The correct choice is D. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

124. B — The correct choice is B. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

125. A — The correct choice is A. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

126. C — The correct choice is C. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

127. A — The correct choice is A. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

128. B — The correct choice is B. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

129. D — The correct choice is D. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

130. C — The correct choice is C. 'Carefully' describes work done with attention to accuracy and detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words,

unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

131. D — The correct choice is D. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

132. C — The correct choice is C. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

133. A — The correct choice is A. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

134. B — The correct choice is B. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

135. C — The correct choice is C. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

136. A — The correct choice is A. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

137. B — The correct choice is B. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

138. D — The correct choice is D. 'Practical' describes a plan that can be carried out effectively in real conditions. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

139. A — The correct choice is A. 'And' correctly joins two related events without adding an unsupported cause or contrast. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

140. C — The correct choice is C. The singular subject 'every box' requires the singular verb 'contains.' Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

141. B — The correct choice is B. 'However' signals a contrast between the favorable conditions and the unexpected result. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

142. D — The correct choice is D. The choice summarizes all the projects instead of focusing on a single detail. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

143. C — The correct choice is C. The before-and-after completion data directly measure the claimed increase. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

144. D — The correct choice is D. The revision removes redundant signals of personal opinion while preserving the claim. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

145. A — The correct choice is A. The recommendation depends on the likelihood that the new time would serve the identified residents. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.

146. B — The correct choice is B. 'Confirm' means to verify that information is accurate before using it. Effective readers consider the complete sentence or passage. Reject choices based on isolated words, unsupported claims, or minor details. Focus on logic, precision, evidence, and the writer's stated purpose. This approach improves accuracy across editing and reading questions.
